Question Brought to Front in Effort to Settle St. John River Power Rights

WASHINGTON, June 22-The order to the New Brunswick Electric to develop hydroelectric power at Grand Falls on the St. John River, it is expected, will be issued simultaneously in Washingon and Ottawa after the meeting of the International Joint Commission here. The three Canadian commis-sioners, Charles A. Magrath, Sir William Heart and H. A. Powell, with Clarence D. Clark, Fred T. Dubois and Porter James McCumber, United States commissioners, are engaged on the final draft of the order, which should be ready at an early date.

One of the provisions of the order which has been much discussed relates to the allotment of power to the United States. At the meeting in power should be made available for the International Paper Company or

Allotment of Energy

developed power. The International dren and the protection of native Joint Commission made no pro-nouncement on this claim, but the among the reports of world superinorder provides that should the New tendents as the big convention setsion fail at any time to supply the meeting.

to settle the adjustment of claims be-tween the respective countries by judicial procedure. Although the site of the power plant is entirely within Canadian territory, it is believed that it eventually be necessary to extend conservation work into the State of Maine to obtain full economic devel-

Mine Union Leader Pleads for Industry's Stabilization

J. L. Lewis Says Uneconomic Mines Must Be Closed and Overproduction Stopped

INDIANAPOLIS, Ind., June 20 (Special Correspondence) overdevelopment of the coal business which all the tribunals have agreed is its basic ill, is on the way to elimination." declares John L. Lewis, president of the United Mine Workers of America, in his book, "The Miners" Fight for American Standards," with which he has just entered the lit-Since the railroads began to sup-

ply enough cars, "the potential pro-duction was soon found to be around 40 per cent over peak demand," the writer goes on. "The achievement of the railroads

has already precipitated a struggle between operators that bids fair to become the fiercest in the history of Wages and Prices Cut

"The nonunion fields, further re-moved from the large centers of consumption than the unionized mines and therefore handicapped by higher Speaker Says British Drink freight rates, have cut wages and coal prices in the hope of winning the markets heretofore supplied by union coal.

"With an adequate car supply neither the nonunion nor the union operators can hope for the high prices caused by the annual car shortage. With a three-year agree ment in the union fields (now in force) which forestalls strikes and leaves no hope to the nonunion operator of profiteering at the expense of the union fields during sus-

Mr. Lewis states that the compe tition resulting from overdevelopment is "ruinous to all but the strongest and most efficient coal companies," and "is reflected in a widespread demand from the more adversely affected operators for a wage reduction in the union fields."

Summary of Conclusions "The United Mine Workers of America, speaking for its own membership, but indirectly shielding the asked to suspend the law which labor of the nonunion fields from further cuts, which would instantly follow a reduction in the union fields. rejects any such proposal not only in the interests of its own members but in the interest of the industry itself. A wage reduction would serve only to prolong the maladies of the industry while sacrificing the rights of the miners."

Summarizing his conclusions, Mr. Lewis declares that to provide stability in the Nation's basic industry. with fair return to owners and em-

Wage Negotiations Between China, Japan Line, captains of the Miners and Employers Said to Have Reached Crisis

By Cable from Monitor Bureau LONDON, June 22-A crisis has been reached in the coal-trade wage negotiations between the miners and employers. George Buchanan, Labor Member of Parliament, speaking at Hull last night, went so far, indeed, as to say he understood the existing national wage agreement is to terminate, and that Parliament is to be guarantees the miners a seven-hour day, with a view to a return to the eight-hour arrangement, on which mine owners are prepared to declare

Frank Hodges, lately secretary of the Miners' Federation, spoke to somewhat similar effect on Saturday at Buckley, North Wales, where he protested against the mine owners intentions. These statements are both premature, a representative of The Christian Science Monitor understands in so far that no decision to this effect has yet been taken by the mine owners whose representatives closed, and closed for good.

On the joint committee of inquiry

'Unscientific freight rates must be are to meet the miners here again

the mining association represent "American political rights must ing the owners is to meet here. The have as equal value everywhere as fact is that although the coal owners

have no desire to precipitate trouble they hold generally that somehow or be lowered. They argue, however, that even if month's notice to terminate the existing agreement be given on June 30, this only means clearing the way

basis which shall take the present market conditions for coal into account, without necessarily reducing the men's actual weekly earnings. The prospects of mutual concessions upon these lines have been improved by joint negotiations still proceeding, since these have helped each side to see the other's diffi-

The statement in part reads:

Two years ago, when flour was sold at \$2 per bag, the workers received 18 cents a day, in American currency, 9 cents; and at that time the product of the mills was sold also at a rather low price. Now, the living conditions being more expensive, flour is sold at \$4 per bag, and the mills are making profit through the increased price on the product, but the workers are now still receiving 18 cents a day.

PROTECTION IS GUARANTEED IN CHINESE STRIKE

Government Issues Notification Reassuring Residents of Hong Kong

HONG KONG, June 22 (AP)-The Government here today issued a notification guaranteeing full protection to life and property during the sym-pathetic strike now being carried on here by Chinese students and workers. The family of any person killed while engaged in carrying on his customary work will be paid \$2000, the notice said.

The threatened strike in Hong Kong of natives employed by foreigners apparently began to develop today, when delivery coolies of the Dairy Farm Company struck, as did Chinese compositors and coolies on the Daily Bulletin. Compositors in other European print shops were threat-ening to walk out this evening.

Girls replaced Chinese striking elevator operators at the Hong Kong Hotel today, while the hotel bandsmen, Filipinos, put down their in-struments and substituted for Chinese table boys who left their posts.

A number of British and Portu-

guese boys volunteered their serv-ices in other departments of the hotel affected by the strike. Chinese office boys employed by the principal mercantile firms were

When attempts were made by striking Chinese to intimidate the crews of three steamers of the Java, vessels slipped their craft from the moorings and moved to Stonecutters Island, where they obtained clearance papers and steamed out of the

British and other foreign women and children arrived here yesterday from Shameen, the foreign quarter of Canton, which they were advised to leave. The volunteers of the for-eign settlements of Hong Kong have een mobilized. Armed pickets and police are patroling the business secions as a precautionary measure. An exodus of Chinese residents of Hong Kong has started. Chinese owned steamers, bound for Canton, are packed densely with them.

Boston Chinese Students Describe Mill Conditions

ALIENSCONTINUE TO BE SMUGGLED ACROSS BORDER

Methods of Fraud Practiced to Gain Admission to the United States via Canada

DEPORTATION IS ONLY PUNITIVE METHOD

Only 260 American Officials Are Available to Guard **Extensive Boundaries**

By a Staff Correspondent QUEBEC, June 22-Methods of fraud and subterfuge still make it possible for aliens to gain admittance to the United States across the Canadian border, despite the restrictive provisions of the quota, a survey undertaken by a representative of The Christian Science Monitor and extended from Maine to Michigan reveals. Observers all along the line agree that many aliens, and some of them extremely undesirable, are reaching the United States by this route, although the enforcement machinery of the 1924 immigration act is constantly being made more

The international boundary between Canada and the United States runs over mountains, isolated for-ests, lakes and through the heart of towns and cities. In the face of European pressure to gain admit-tance to the United States, the difficulties in the way of quota enforcement along this extensive and ever-changing boundary are tremendous. One million immigrants came to American ports for admittance be-IS ASSURED BY WILLIS H. BOOTH permitted legal entry has been reduced to a fraction of this.

Forged Passports Used

The result has been the smuggling in of aliens along the border, which American officials on all sides are willing to admit has reached large proportions. Forged passports, fraudulently obtained credentials and other deceptions are reported by the small force of immigration officers now employed to cope with the situa-tion. If aliens are discovered in the United States after illicit entry there is ordinarily no other punishment for

them but deportation. Every loophole in the law pertaining to supposed "students," "wives of Americans," "temporary visitors" and the like is utilized to effect illicit entry by the extra-quota immigrants swarming about the border. The survey indicates that enforce-ment machinery is moving steadily to better protection, but present conditions reveal that drastic extensions of the American border guard are

Officials Estimate Illicit Entry Official estimates number the alinto the United States at over 100. for European aliens seeking to get

far inland before crossing. city is only five minutes distant by ferry from Windsor, Canada. Ferries make the trip at 10-minute intervals all day, carrying an average of 1000 factically one community, though them. The check against illicit entry of aliens is made here by six or seven immigration officials who are unable to spare more than fire to ten seconds on an average for each

"Where do you come from?" asks the inspector. commuter at the ferry wicket may The inspector gives a quick say. look, and in 99 cases out of 100 adds nothing else but passes the traveler. In the hundredth case he stops him.

American-Made Clothes Supplied Frequently the inspector only looks at the label of the travelers' groups or "rings" of allen smug-glers have included a cheap suit of

American-made clothes in the out-fits supplied their "clients."

The United States, according to one official, cannot be satisfied with an immigration law that bases its enforcement test on a clothes label. A Canadian of the writer's acquaintance recently from curiosity made a personal test of the United States quota enforcement at this spot. When his part of the line of disembarking passengers reached the inspectors, and he was asked his residence, he boldly declared St. Louis. To the in-spector's question, "How long have you lived in the United States," he answered, "all my life." This Cana-dian was passed in this and a subsequent experiment without the slightest difficulty. As he listened to the same routine questions put by the inspectors to others of the hurrying hundreds crossing from one nation other, is it small wonder that he felt there might be aliens, among that crowd answering St. Louis or New York to the rushed inspectors, who had never been in the United States before and who were seeking to complete a real deception in order to thwart the law of the country which they were entering.

Allens Illegally in New York Speaking of the inadequacy of the immigration force in only one city, Henry M. Curran, commissioner at Ellis Island, says: "We have been falling behind with our work for almost a year: We have information regarding nearly 3000 aliens in New York City alone who are supposed to be in this country illegally, but ,who are allowed to remain simply because we have no one to send out after them. These 3000 are only the ones who threw themselves at us by applying for naturalization papers

and in other ways.

In places like the Windsor-Detroit ferries and other international crossings that will be described later, it would seem that a series of wellauthenticated passes with the commuter's photograph and signature would save time for people all ers could prove their identity with slight inconvenience and more efficiency at special offices for that purpose before crossing.

DRY AGENTS SEIZE FRENCH SCHOONER

Cherie Had 3000 Cases of Liquor on Board

BANGOR, Me., June 22 (AP)-The French two-masted schooner Cherie was seized off the Hancock County shore by federal prohibition agents late yesterday with 3000 cases of mately \$275,000. The vessel was being towed here today.

France, and the members of the crew were to be arraigned before a federal commissioner here. As the seizure was made only six miles off Swan's Island, it was understood the charge would be conspiracy to smug-

Papers, seized on board the schooner, according to the officers, revealed information which may lead to other seizures in New England. No resistance was offered by the members of the crew, who were taken by surprise as eight federal officials and two coast guardsmen in the amall launch, Catherine, ap-

KIWANIANS ASK CLEANER PRESS

Move for Nation-Wide Campaign Will Start at Convention in St. Paul

ST. PAUL, Minn., June 22 (Special)-Delegates to the Kiwanis International convention opening here today will be urged to get back of a nation-wide campaign of "press purification." This move is announced by the Butler, Pa., dele gate, the Rev. W. M. Schramm. The Butler Club voted unanimously to urge upon the convention co-opera tion with the daily press of the United States to this end.

The issue will be placed before the 5000 delegates, gathered here from all sections of North America after it is acted on by the commit tee on resolutions. Support of the Eighteenth Amendment and completion of the projected Great Lakesto-tidewater deep waterway, further efforts on behalf of the "under privileged" child and election of an international president are other subjects for consideration.

Discussing the cleaner press pro posal in a statement for The Christian Science Monitor, the Rev. Mr. Schramm said:

"The purpose of presenting an activity before the Kiwanis international convention dealing with a purification of the daily press is to arouse public opinion to the point where the press will recognize the need of eliminating sensational news, or at least segregating it to a less conspicuous place than the front page. At present we are confronted daily with the most lurid descriptions of crime and scandal, with headlines which cannot be escaped. There is no doubt that the suggestions thus broadcast daily have a direct influ-ence on the minds of readers, particularly the younger generation."

Mr. Schram said it is possible the

public is not fully prepared for com-plete eliminition of such news, but expressed the belief that "it is chusetts Horticultural Society show highly desirable that it should not has occasioned quite the interest as be given such prominence." He that of the president's cup, offered added: "In many criminal cases by A. C. Burrage for the most meriwhich have been nationally reported the criminal has been painted as a torious exhibit, to Mrs. William B. hero. It is evident that such a state Parker, an amateur who had never is not conducive to the proper ad- previously exhibited, for her single

ministration of justice. "We are acting in a friendly manner with the best of good will toward the press and with no idea of coercion and with no idea of dictating French liquors, valued at approxi- to the press. Our aim briefly is to let the public demand be audible to the press, and we know the press Capt. Harry Ducos of Bordeaux, will respond when the demand is of sufficient volume.

The land of the 10,000 lakes, as Minnesota is sometiems called, has made big preparations to receive the Kiwanians during their four-day visit here, A pageant, a mid-summer ice carnival, and greetings by Theodore Christianson, Governor of Minnesota, and Arthur E. Nelson, Mayor of St. Paul, are outstanding features. The ice carnival Wednesday night is unique even for the northwest. Dog sleds, hockey games and champion ice skaters will be in evidence in a

called 'workers saving fund' whereby a part of the wage is kept by the company, but the workers are not to receive any part of the money if he leaves work within a year.

Children 13 or 14 years of age are to work for 13 or 14 hours a day constantly on their feet. Workers, men and women alike, are searehed every day when they leave the mill. The process takes more than an hour, as there are a few thousands of workers. On rainy days workers have to fall in line to by a part of the wage is kept by days workers have to fall in line to be searched until they are drenched with rain. Working rooms are poorly heated in winter and poorly ventilated in the summer. Workers are not allowed to wear heavy clothing in winter, because, says the employer, heavy clothing produces clumsiness and thereby reduces efficiency of working. The workers are not given a lunch room. They have to eat while working. So they swallow much cotton along with

their food.

Workers are compelled to drink water from the same pool where they wash their face. Eight workers sleep in a small room. Children workers are given a paper meal ticket every day. If he should lose the ticket, he is fined 10 cents. their food.

Authorities Assuring

All Essential Services LONDON, June 22 (AP)-Describing the situation in Hong Kong, where an anti-foreign strike is in progress, Reuter's correspondent today tele-

The fourth day of the Chinese strike finds Hong Kong witnessing a condition of affairs unparallelled in its history. Through secret or ganizations, financed from Canton, the Chinese in British and foreign employ in the colony here have been intimidated in a manner which is dislocating shipping, commercial and domestic life.

and domestic life.

The strikers generally admit that they have no grievances against their employers, but have been terrorized by agitators styling themselves "The Dare to Die Corps."

The result is that a senseless, frantic stampede toward Canton is occurring. On the other hand, the Hong Kong authorities are fully

Hong Kong authorities are fully prepared to meet every emergency and are assuring the essential Canton reports that a community kitchen has been established there for the Europeans, who are doing their own cooking. Marines ope-

rate the waterworks, and unarmed volunteers patrol Shameen (the for-eign section of Canton). The Kwangtung Students' Association has issued a statement urg-ing a boycott and strike, adding: 'We must join the soldiers and fight

VASE OF PEONIES WINS PRIZE CUP

Awards Made at Peony and Rose Show of State Horticultural Society

No previous award in a Massachusetts Horticultural Society show vase of Marie Lemonie white peonies. The judges were unanimous, even in the presence of the excellences of the tremendous peony garden set up by the Cherry Hill Nurseries and the exquisite perennial garden shown by T. F. Donahue of Newton Lower

Although the decision of the committee was somewhat hastily made to include roses with peonies in the show and the rose classes were small they had excellent representation. Single exhibits of sweet peas, delphiniums, sweetwilliams, strawberries, cherries and vegetables amplified the exhibition and the prize touched a wide circle of exhibitors emphasizing the tendency of competitive interest in one flower and its propagation to extend to other

Best Display for Effect

First for display of peonies arranged for effect was taken by the Cherry Hill Nurseries of T. C. Thurlow's Sons, West Newbury; second by Anton Bulk, Newport, R. I. Best collection of double peonies and three blooms of any new double same subject, accentuated the in- Science Publishing House

The American Peony Society's silver medal for the best collection of 110 varieties, named, one flower each, went to T. C. Thurlow's Sons.

For a display of hardy roses, first hardy perennials, second went to Henry L. F. Naber, West Roxbury. Rest collection of herbaceous border 5 distinct species and not less than 0 genera, first went to T. F. Donahue of Donamere, Newton Lower Falls.

Award for Delphiniums

Miss Marion Roby Case of Hillrest Gardens, Weston, took first for a best collection of delphiniums. Mrs. George H. Waring took a first for hardy perpetual roses, best three blooms of any white, and Mrs. Homer Gage's gardens at Iristhorne, Shrewsbury, took second. Best three blooms of any pink went to Mrs. George H. Waring, Tiverton, and best three looms of any red to Wilton R. Fav. For basket of hardy perpetual roses, artistically arranged, first went to Iristhorpe. T. F. Donahue won first with six varieties of sweet williams and M. L. Coburn, Everett, second. T. F. Donahue won first also with campanula mediums, and Mrs. Homer Gage first for a basket of out-

door flowers tastefully arranged. Sweet pea prizes went entirely to Mrs. John Aspegren, Newport, R. I., gardener C. E. Bond. For collection of wild flowers of named varieties F. C. Upham, Melrose, took first and Miss Marion E. Donald, Brookline, second.

For hardy pinks silver medal went to Robert Laurie & Sons, Stoughton, and a silver medal was awarded Harry A. Norton of Ayers Cliff, Quebec, for a display of peonies.

SEE GEYSERLAND IN YELLOWSTONE PARK

At Your Grocer's DES MOINES, 10WA

Old Faithful hurls enough water into the air daily to supply a city of 300,000 inhabitants. There are more geysers in Yellow-stone Park than in all the rest of the

world. Literal volcanoes of water, some of them. For example, Old Faithful, the most famous of all geysers, hurls a column of water 120 to 170 feet into the air every 60 to 80 minutes. This column contains a million and a half gallons of water, or 32 2020 colleges a day sufficient to 33,225,000 gallons a day—sufficient to supply a city of 300,000 people.

Old Faithful is just one of the aston-

ishing sights you can see at Yellow-stone Park this summer. There are beaver and bear and buffalo, antelope and deer and elk, and 200 species of birds, wily mountain big-horn sheep, too, and giant moose.

You owe yourself such a vacation,

You owe yourself such a vacation, one you never can forget, for the appeal of Yellowstone is so strong you will want to return there again and again. Northern Pacific fine trains will take you to Gardiner Gateway, the northern and original entrance to the Park. The standard Park tour is 4½ daye—\$54 if you stay at the hotels—\$45 at the camps—lodging, meals, sightseeing auto tours included. Leaving by the Cody gateway will give you opportunity to see the spectacular Buffalo Bill country and Cody road.

Round trip fare from Boston to Yellowstone Park is \$115.90. Ask C. E. Foster, G. A. P. D., 217 Old South Bldg., Boston, Mass., Dept. V, the Northern Pacific representative for full travel information and literature.

The Spanish Note in Outdoor Furniture for the Verandah, Beach and Lawn

A colorful umbrella pitched on beach or lawn, at just the right angle to screen one from the sun but not the breeze. . . . A comfortable reclining chair stretched in its shade. . . . A tall glass tinkling with ice. The latest novel well within reach. . . . There are few more certain recipes for making a complete success of one's vacation leisure, no matter where it be spent. And-be it added!-there are few, if any, places where one will find a more fascinating array of the essential ingredients for this particular vacation recipe than at Wanamaker's.

Picturesque Colorings That Defy the Sun

As a result of our initiative in introducing the vivid hues of Spain into this outdoor furniture, a special material has been produced which makes the gay stripes of black and orange, green and peacock blue, yellow and Spanish red dependably sun and weather proof.

Here are sets of stunning big lawn umbrellas with canvas covered chairs and table to match. Charming miniature ones for the children, too, decorated with gay little Mother Goose and fairy-tale figures. Zinc sand-boxes for play at the beach. Canvas reclining chairs with awnings, steamer chairs, ham-mock chairs and the popular folding yacht chairs with rubber-tipped feet. The last word in luxurious porch swings and glid-ing divans, many covered with distinctive hand-blocked Liberty cretonnes. Some are made exclusively for us in a special size for the smaller verandah.

Couch hammocks begin at \$18. Gliding divans at \$37. Canvas reclining chairs with awning, \$14.50. Without awning, \$9.75. Beach umbrellas, plain and striped, \$5 to \$8. Folding yacht chairs, \$6.50. Set of lawn umbrella, canvas covered table and four canvas covered chairs, \$79. Children's play set with ambrella and sand-box, \$22. Quiet hues, too, as well as the more striking colors.

LIBRARIANS IN CONFERENCE

All New England Meeting sistant professor in that department at Swampscott to Continue Through Week

SWAMPSCOTT, Mass., June 22 (Special)-Practical problems in the administration of a library will form the basis of discussion at the All New England Library Conference opening at the New Ocean House here today. The discussions will be Instructor in Personnel Mansupplemented by talks and addresses on allied subjects by speakers of note. Inspection of libraries, art galleries, museums, and places of nistoric interest in and near Boston is another feature of the program having distinct bearing on the service to be rendered by a library.

The conference will open formally tonight with a dinner, to be presided over by Edward H. Redstone, president of the Massachusetts Library Club and librarian of the Massachu-setts State Library. This will be followed by an address on "The Making of a Book," by Albert J. Beverldge, author and former member of the United States Senate.

Miss Ethel Dane Roberts, librarian at Wellesley College, is to give a talk Tuesday afternoon on a visit to European libraries during a sabbatital year. The following day Hamilton Holt, formerly editor of The Independent, is to talk on editing a magazine. J. Randolph Coolidge of Squam Lake, N. H., will talk on building the small library for beauty

Mrs. Maude Howe Elliott, daughter of Julia Ward Howe and herself a writer of note, will be the speaker on Wednesday evening. Her subject has not been announced. Prof. William H. Hartshorn of Bates College is to speak the next morning on the value of novel reading. He is to be followed by an informal talk on Kate Douglas Wiggin as a summer neigh-bor, to be given by A. L. T. Cum-mings, secretary of the Maine State

Chamber of Commerce. Still another interesting feature is a discussion of everyday English to take place Friday evening. It will be lead by Prof. Roy E. Davis of Boston University College of Business Ad-

> New England at present, is the pending conferences on the new working agreement between the miners and operators. One of the acute points of controversy is the miners' claim that he has not got a larger proportion of the increase in the cost of coal to the public.

More than one so-called "adjustment" of differences between miner and operator has been nicely settled between the contending forces by an increase of pay, which the operators have covered by passing along to the consumer, as was exemplified by the consumer, as was exemplified by the 1923 Governor Pinchot arbritra-

where the public demanded coal at any cost, Governor Pinchot awarded the miners 10 per cent increase in wages, with the "suggestion" that the operators could absorb this without passing it on to the consumer, but in any case, that there should be no increase of more than 60 cents per ton to the consumer. The operators listened, and charged 90 cents per ton extra.

cents per ton extra.

Now the miners feel that the additional price charged the public has not been fairly divided with them. and as the recurrent conversations between the miners and operators seem to be best conducted in good transportation weather, this com-mittee feels that it is not doing its duty unless it suggests an early fill-ing of coal bins. With filled cellars, New England can view with more equanimity the September coal-mining debates.

LARGE WILLIAMS CLASS GRADUATES

Honorary Degrees Conferred Upon Seven Men

WILLIAMSTOWN, Mass., June 22 (A)-Two New England college presidents and an associate justice of the United States Supreme Court were among the eight recipients of honorary degrees at the one hundred and thirty-first annual commencement of Williams College today.

The degree of Doctor of Laws was conferred on Dr. Ernest Martin Hop-kins, president of Dartmouth, and Justice Harlan Fiske Stone of the Supreme Court, while Dr. William Allan Neilson, president of Smith College, received the degree of Doctor of Humane Letters. Others who were honored were:

Doctor of Divinity-The Rev. Robert Russell Wicks, Holyoke, Mass.; the Rev. Charles Whitney Gilkey Chicago.

Senior Geologist, United States Geological Survey. Master of Arts-Benjamin Lord Buckley, principal of Buckley School.

Deerfield. A graduating class of 136, the largest in the history of the college, received degrees in course at the commencement exercises. At the alumni luncheon it was announced Prices Believed at Year's that gifts aggregating \$254,575 had been received during the year for endowment and other purposes. Of this total, contributions to the Williams War Memorial Endowment

fund reached \$136,015. The class of 1900 was awarded the With reports coming from various class cup for the best attendance at retail relations of New England that retail

VISION TEST BILL WOULD YIELD MILLION TO DOCTORS, IS CHARGE

Medical Liberty League, in Open Letter to Legislators, Protests Against Measure Which Is Proposed by American Medical Association

Henry D. Nunn, general counsel of the Medical Liberty League, Inc. oday addressed the following open letter to senators and representaives of the Massachusetts Legislature with respect to a measure proposed by the American Medical Association that every automobile driver must be certified as to vision by a physician to obtain a license to operate his machine:

We desire to give you timely We desire to give you timely notice that an attempt will likely be made at the next session of the General Court to secure the passage of a bill, the undoubted effect of which would be to increase the aggregate income of the so-called regular physicians of Massachusetts by \$1,000,000 or more annually. Improving business by legislative flat is less difficult than might be supposed. ficult than might be supposed.

This prospective measure, while in effect a scheme to tax every driver of an automobile for the benefit and advantage of licensed physicians and surgeons, will ostensibly be a measure surgeons, will ostensiny be a meas-ure for the protection of the public, in favor of which plausible argu-ments are not wanting, for it is hardly necessary to do more than state the proposition that the highways would be safer if all mo-torists were super-men and women.

It is seriously proposed by the American Medical Association that Every individual driving a motor yehicle, private, public or commer-, shall be required to present to the motor licensing board in each state a certificate from a reputable physician" to the effect that the driver has been duly examined and Doctor of Science-David White

found to possess normal vision in accordance with certain standards fixed by the opthalmological section of the American Medical Associa-tion. The term "reputable physician" New York: Frank Learoyd Boyden. is carefully defined to mean licensed headmaster of Deerfield School,

is carefully defined to mean licensed physician. An overwhelming majority of licensed physicians are members of the A. M. A.

For the issuance of such medical certificate, it is proposed that a fee shall be paid by the driver to the examining physician. Considering the fact that there are over 500,000 motor vehicle drivers in Massachumeter vehicle drivers in Massachumeter. motor vehicle drivers in Massachusetts alone, it is apparent that this scheme, if successful, will constitute something like a royal grant of pecuniary aid to an already favored class. The plan also calls for the appointment of an indefinite number of boards of review, "consisting of two general practitioners or surgeons, and one opthalmologist" (or eye specialist), who shall constitute a court of last resort for all disputed cases, and "these boards shall be ap-pointed by the Governor and shall be recompensed either by a fee paid by the applicants who may appear be-fore them, or they shall be salaried officers directly connected with the department in each state controlling

the granting of motor licenses. Journal of the American Medical Association, June 6, 1925, page 1743.

sion is not the exuberant dream of some irresponsible medical enthusiast. It is a considered plan, worked out by the "Committee on Physical Standards for Drivers of Motor Vehicles," of the Section on Opthalmology, of the American Medical Association. Medical Association.

Medical Association.

At the recent annual session of the American Medical Association held in Atlantic City, the plan above described was by formal resolution approved by the house of delegates, the governing body of the association. Hence this scheme is official, and will undoubtedly be pushed, as the extremely arganization and powerful organization.

and will undoubtedly be pushed, as this astute and powerful organization so well knows how to push the measure it puts forward "for the benefit of the public."

If once the door is opened for a legally required medical examination for exessisht as a prerequisite to the Issuance of a motor driver's license, it would not be long before examination as to hearing, mental filmess tion as to hearing, mental fitness and muscular reactions would be de-manded. Possibly it would even be thought profitable to subject pedes-trians to certain tests. Why not?

RADIO MORNING WATCH DEFERRED UNTIL FALL

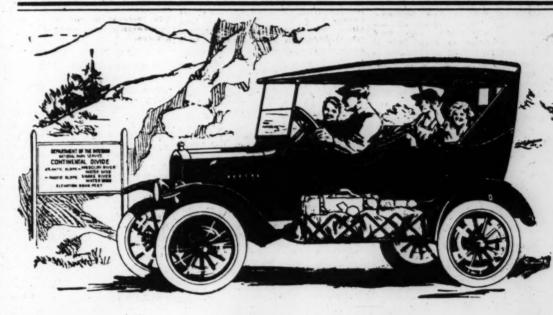

The "Morning Watch," a popular radio feature inaugurated on April 6 by Station WEEI under the auspices of the Boston Y. M. C. A., and which is now being copied in other cities of the country, has been sus pended during the summer but will e resumed on Sept. 28.

More than 1000 letters from al! over New England have been received, up to date, commending the "Morning Watch," which is a revival of an old New England cus-tom of having religious services every morning just before the day's work begins. The Boston idea has been taken up in Chicago, Detroit, Cleveland and other cities, and is gaining ground rapidly as a strong radio feature.

BUSINESS MEN PLAN INDUSTRIAL TOUR

Special from Monitor 24reau NEW YORK, June 22 - Thirty young business executives under the chairmanship of Robert E. Condon, president of the New York Junior Board of Trade and Transportation, representing as many classes of business, commerce and professions, leave next Friday aboard the New York industrial tour special, via the New York Central, to visit as guests of the respective chambers of commerce. Detroit, Chicago, St. Louis, Kansas City and Tulsa, Okla. They will attend the sixth annual

convention of the United States Junfor Chamber of Commerce at Tulsa. Mr. Condon is first vice-president.

Vacation Days

More than 8,900 Ford cars from every section of the country visited the Yellowstone National Park during the open season of 93 days in 1924. Here is real evidence that for long tours as well as short trips, the Ford car is a favorite among motorists everywhere.

Ford popularity is based upon small first cost and low operating expense. You can buy a Ford on easy payments and take a real vacation this summer-go with the whole family to the mountains, or seashore; visit the Yosemite Valley, the Grand Canyon, Glacier National Park, the Great Lakes or the Adirondack Mountains. Wherever you drive along the nation's highways, you will find an Authorized Ford Dealer ready to serve you and glad to direct you along the way.

BIRDS PROVED FARM ASSETS

Guarding of Crops Against Insect Pests Verified in Massachusetts

birds, according to a statement is-sued by the American Humane Education Society.

"The farmer," it said further, "who sees birds eating his cherries may not consider the crops they save by destroying insects, nor remember that it is not in the summer only but in the winter also that the birds are To determine accurately the birds

which are of greatest value to agri-culture the Massachusetts Department of Agriculture made a detailed investigation of the diet of 26.00 birds. It reached this conclusion: "As especially good friends of the farmer, who should protect them in every possible way, are the following birds: Phœbe, kingbird, catbird swallow, brown thrasher, rose-breasted grosbeak, house wren, vireo, cuckoo, oriole, the various native sparrows, warblers, shoe lark, log-

gerhead shrike, and meadow lark. Declared Farmers' Friends

"The crow, crow blackbird and cedar bird do more good than harm. The redhead and sapsucker woodpeckers may be injurious or beneficial, according to circumstances, but all the rest of the woodpeckers are Cooper's hawk and the sharp-skinned. while all the rest are very helpful to the farmer and fruit-grower.' The American Humane Education Society, in its report, adds:

Labor saving inventions are the large sums of money in procuring instruments to help in their work, but many of them ignore or destroy their most valuable assistants. Those who have made a study of the sublect tell us that without the birds no farming could be carried on. Every year one-tenth of all the products of agriculture is destroyed by insects. It is said that there are over 100 000 kinds of insects in the United States, the majority of which are in-jurious, and that one insect-eating bird destroys 2400 insects in a year. Many believe that if the birds had been allowed to multiply instead of being destroyed, there would now be no necessity to spend thousands of dollars every year for insect sprays

Economic Value of Birds Frank M. Chapman says that the conomic value of birds to man lies

in the service they render in pre-venting the undue increase of in-sects, in devouring small rodents, in destroying seeds of harmful plants and in acting as scavengers. Leading entomologists estimate that in-sects cause an annual loss of \$800.-000.000 to \$900,000,000 to the agricul-tural interests of the United States. If we were deprived of the services of birds the earth would soon become uninhabitable.

The chickadee, nuthatch, woodpecker, and other birds are searching in the tree trunks and along the fences for the eggs and buried larvæ of insects, which would, if not dis-turbed, hatch out millions of flying and crawling creatures that would and crawling creatures that would destroy the garden, orchard and field. Some farmers are beginning to appreciate the value of birds as sect destroyers and understand the necessity for active measures to in-sure their protection.

Our cows and horses eat our grain strange, indeed, if we were unwilling to spare the small quantity which the birds take during a few weeks when they pass the rest of the sum-mer as unpaid day laborers in our farms and gardens, freeing us from pests which threaten to destr our profits.

MOROCCO RICH IN PHOSPHATES

Existence of Kourigha Deposit Not Even Suspected as Late as 1915

TANGIER, May 30 (Special Correpondence) - The extraordinary development which has taken place in connection with the production of suspected at Kourigha, the district from which it is now mostly obtained. In fact, on the preliminary tain data as to the economic resources which might affect the question of transportation, this part of the country was summarized as being a plain covered with a weed called fennel. And yet, beneath the surface there lay the most fabulou riches, which, according to a high French official, will last for a thousand years, even if six times as

much is exported as at present.
The exports of phosphates from the French Zone in Morocco in 1924 amounted to 436,340 tons, the principal countries of destination being France 113,476 tons, Spain 108,564 ons. Holland 77,875 tons. Denmark 33,108 tons, United Kingdom 30,228 tons, Czechoslovakia 14,175 tons, and spondence)—The opinions upon the Belgium 11,313 tons. It was only cinema of nearly 200 school children about four years ago that the export between the ages of 12 and 13, living of phosphate from Morocco began. have been as follows: 1921, 6981 tons; 1922, 75,220 tons; 1923, 190,860

But the prospecting for and ploiting of the phosphate deposits in Morocco would never have arrived motion picture shows. The opinions at the present promising condition were obtained by setting the children had the individual been left to his own resources; it needed the large area to write compositions discussing vision, and the combined effort of freely their attitude to the pictures the whole. It was a wise policy of the Government, therefore, to amal-The first remarkable feature of the gamate the claims, and create a essays was the enthusiasm with monopoly. To this end the prospec-which the children had entered upon tor was reimbursed, and there was instituted a separate department, known as the Office Cherifien des Phosphates, which issues annual reports as to its activities.

In time, Kourigha was joined with Casablanca by a railway; and on arrival the phosphate is deposited n a silo to await shipment loading is carried out by mechanical means, vessels lying beside a specialconstructed quay on the breakwater near the silo.

An important phosphate deposit in North Africa is worked by the Gafsa Company in Tunisia, but the Moroe can phosphate has the advantage of being much richer.

A Cleaner World

Boys and girls of 50 countries, European, Asiatic, and American, are enrolled in the cause of a cleaner world in the Loyal Temperance Legion, the junior branch of the world organization, according to reports from Miss Mary B. Erwin of Evanston, Ill., superintendent of the World and United States Loyal Temperance Legion. They are working according to Miss Gordon's "missionary pledge," written for the children of the United States: "I pledge my prayers, my zeal, my helping hand for boys and girls of every land," and with their older sisters in the young women's branch, of which Oswald Carver of London is chairman, they are forming a mighty army of young recruits to strengthen the numbers of the main organiza-

A "youth movement" of the finest sort, these young people have been writing individual letters back and forth across the sea, weaving those invisible threads of international relationships upon which future world peace must rest, and 1925, which was inaugurated as "youth's year" in the United States by the National Young Woman's Christian Temperance Union sees special recognition given to the movement throughout world. In the hall, helping as ushers and pages, even on the plat-form, some of these boys and girls are proving in the convention that the prohibition movement is not a thing of the moment, but that is builded into the future with ready young hands waiting to pick up the torch which was lighted by a few home women in Ohio and Pennsylvania half a century ago.

There is an enormous variation in the size of the stream between the spring and autumn months. The minimum flow is small, about 700 feet per second, but in the spring it rises to 100,000 feet per second. Before there can be an economical power development, it is necessary to regulate this flow. The plan of the New Brunswick Electric Power Commission is to impound the water at Grand Falls. As the river beabove the site, the river bank on one side for 27 miles of this regulated level will be United States territory.

Increase in Land Values At the point where the stream the exhibit of the Sunday school de-partment, whose superintendent slides have featured the program in the state of the stream flows across the boundary line, that is, three miles above the Grand Falls Mrs. Stella Blanchard Irvine of been started in the schools of Cuba dam, the regulated level will give the Riverside, Calif., has sent a report, and pamphlets have been distributed river a depth of 16 feet. WATERGIRL FOUNTAIN OFFERS COOL DRINK

London and Portland, Me., Have Copies of Statue

Thousands of children in many lands have helped to make the "Little Cold Water Girl Fountain" a genuine symbol of international good will. This winsome figure holding a bowl of British and beast is to be seen in Chicago,

the World's Woman's Christian Temcalling the period, over 30 years ago, one, which stands in Lincoln

Thousands and thousands of children in all parts of the world contributed dimes for the fountain, designed as a memorial to Frances E. Willard, the founder of the World's Union. We limited contributions to 10 cents, so that a great many children could take part. The fountain became a rallying center for children in the world's temperance movement. The first Little Cold Water Girl Fountain was unveiled at the time of the World's Columbian Exposition in Chicago. An exhibit in the W. C. T. booth at the fair showed an American flag made up of great numbers of red, white and blue cards signed by the children who had con-tributed to the fountain.

A copy of the statue was made in 1897 and unveiled in Temple Gardens, London, as a memorial to Lady Henry Somerset, former president of the World's Union. It stands in a

ANTWERP TO BENEFIT BY PACT FOR REGULATION OF SCHELDT

Larger Share of Traffic With German Hinterland and Ruhr District Likely to Go Through Belgian Port -Hamburg's Trade May Be Affected

spondence) - The new agreement arbitration signed between Belgium and Holland with regard to the improvement of navigability of the Scheldt and the construction of new canals has fect Germany's interests also. Hamburg in particular feels that once the proposed new canals are built, its trade cannot fail to suffer, as that Antwerp will get an even larger share of the traffic with the German hinterland and the Ruhr district than it does at present.

The Belgian port of Antwerp is geographically at a great disadvan-tage as regards the Scheldt traffic, inasmuch as all the estuaries of the Scheldt pass through Dutch territory. Belgium has clearly more to gain than Holland by the development of the navigational facilities of the estuary as the main stream of traffic via the Scheldt reaches the sea at Antwerp. While the freedom of the Scheldt for international shipping is laid down in the Treaty of 1839, it is also clear that this freedom has not much practical value unless the channel be permanently kept in good order by the riparian states for the use of shipping.

Administration of Scheldt The Belgian authorities besides

sking Holland for guarantees on this point also desired to obtain from Holland the right to build on Dutch territory two important canals, the one going via Limburg between Antwerp and the Ruhr and the other joining up Dordrecht at the junction of the Meuse and Rhine with Ant-

Under the arrangement now definitely arrived at between Belgium and Holland, Holland undertakes to keep the Scheldt free from shallows that might impede navigation, each state being responsible for the dredging and other costs incurred in keeping the channels in good order within its own territory. This of course means that Holland will have to do the lion's share of the work. Should improvements or new works become necessary, Belgium and the Netherlands agree to come to an underbeforehand. It is further stipulated that the administration of the Scheldt is to be placed in the hands a Belgian-Dutch commission, knotty points of dispute being re-

The regula-tion of the Meuse is also contem-

Among the regulations laid down for the navigation of the Scheidt em-phasis is laid upon freedom for all-commercial shipping. Equality of treatment is guaranteed to the goods, and the flags of all nations, and it is nised that the dues for pilotage, etc., shall be kept within reasonable limits. It is noteworthy that the plan of freedom for shipping is to hold good, even in case of war. Belgium and Holland have also given guarantees to raise no obstacles of any kind that will hamper shipping trading with the lower Scheldt. Confiscation of ships is declared unjustiflable under all circumstances, not even the judgment of a court making an exception to this rule.

TELEPHONE COST RISE DISPUTED

Witness for Protesting Cities Tells of Lowered Commodity Prices

Samuel H. Mildram, consulting expert in the establishment of telephone plants and their operation, and employed by the city of Boston and the other cities and towns of the State which are protesting against rate increases sought by the New England Telephone & Telegraph Company, took exception at the hearing today to the testimony offered by Matt B. which the latter gave reasons for

Mr. Mildram said that Mr. Jones, in his direct testimony, some months ago, had given as one of the chief reasons for the necessity of the advanced rates the need of the company for more money to build much-needed new plants. The company president, Mr. Mildram said, had stated that the prices for new plant construction were constantly in-

Benefit of Contract

Mr. Mildram questioned this, stating that copper, for example, is contract of the telephone company with the Western Electric Company would give the New England Company the advantage of buying copper at the lowering prices when it desired to purchase aerial cables.

Charles S. Pierce, general counsel and vice-president of the telephone company, interjected the remark: "Let the contract speak for itself, Mr. Mildram.

Mr. Mildram, however, continued his argument, and Mr. Pierce objected to the commissioners, saying ward." the witness should stop when ob lections were raised to his state-

E. Mark Sullivan, chief counsels for the protesting municipalities, insisted that the witness was answering his questions and should be al-

lowed to continue. Mr. Mildram made it clear that he believed that the contract was such that despite the lowering of copper prices, the telephone company could, under the contract, go into the open market for its supplies but that it must pay the Western Electric what This he did despite Mr. Pierce's objections.

> In connection with its world cruise by the Resolute this winter, the United American Lines is planning a "See America" expedition, passengers joining the ship either at New York for the eastward trip, Oct. 24, or at San Francisco for the westward cruise, Feb. 9, and making the transcon-

tinental journey by raft to place of embarkation. The ocean-borne passenger traffic of the United States for 1924 totaled 1 ports of the United States Shipping Board. Of this number, 1,408,000 were travelers to or from foreign ports, and

were divided evenly between "o seas" and near-by" ports. The remaining 106,000 were counted for by 94,000 travelers to and from noncontiguous United States territory and 12,000 intercoastal passengers. In each group, the number of passengers arriving at and departing from United States ports was subtantially the same the total arrivals. from United States ports was sub-stantially the same, the total arrivals being 777,000 and departures, 737,000. More than half of all the ocean passenger traffic of the United States passed through the Port of New York

The Goodrich Steamship Lines, operating services on Lake Michigan, resumed services. Daily service from with trains to and from Boston com-menced June 13. In all of these serv-ices, boats are held for arrival of trains if delays are only normal.

Chicago to Milwaukee is maintained and there are also lines to Muskegon, Benton Harbor, Mackinac Island and other points on both shores of the

with Seattle second and Boston third

Exports of motom cars by one com-pany from the United States have in-creased from \$122,000 value in 1911 to \$50,800,000 in 1924. This is the report of the General Motors Corporation

Imports and exports of the United States from Central and South Amer-ica totaled \$1,773,000,000 in 1924, an increase of \$88,000,000 as compared with 1923. The greater portion of the increase was in exports from the United States. Imports amounted to \$1,035,000,000, mostly from Cuba in that district and from Brazil in South America. Exports amounted to \$738,-000,000 and the best customers being Cuba in its district and Argentina in South America. The figures were prepared by Matilda Phillips, chief statistician of the Pan American

Travel from New York to Europe is surpassing all records this summer and passenger officials expect to carry 200,000 tourists during the next three months. Every berth on the Araguaya, of the Royal Mail Line, which left recently for Cherbourg and Southampton via Bermuda, was taken

POLAR FLIGHT AIDS RESEARCH

Knud Rasmussen Says That Amundsen Proved Use of Airplane in Exploration

COPENHAGEN. June 22 (A)-Kuud Rasmussen, the Danish Arctic explorer, commenting upon the Amundsen-Ellsworth attempt to reach the North Pole by air, said that tit is of no consequence that Amundsen did not actually reach the Pole.

"Having been so close to the Pole," Mr. Rasmussen sald, "Amundsen has judicial district use airplanes in Polar researches. The fact that he left Spitzbergen in an airplane and returned from near the Pole in the same way is the point of real importance. There is every reason to believe that his long sojourn at one place near the Pole made it possible for him to make a series of observations.
"On the whole I am of the opinion

that his flight will have a revolu-tionary effect on the methods used n future Arctic researches. One conclusion to be drawn is that more than one airplane must be used to insure success of a Polar aerial ex-

NORTH CAROLINA JUDGES TO CONFER

Attorneys Will Aid in Studying Needs of Courts

RALEIGH, N. C., June 22 (AP)-The udiciary of North Carolina, together proved that the time has come to assemble in Raleigh, Thursday, for the first sitting of the Judicial Conference established by the 1925 General Assembly. Members of the judiciary are automatically members of the conference. The attorneys were appointed by A. W. McLean, Governor, acting under the author-ity vested in him by the act.

The presiding officer will be Judge W. P. Stacy. Chief Justice of the Supreme Court. He will outline the purposes of the conference in an address to the other judges and the attorneys. The establishment of a Judicial

Conference to study the needs of the practicable, to bring about reforms, was urged by the Governor, in a message to the General Assembly last winter. The lawmakers enacted the legislation asked for. In making his appointments, the Governor named 16 Democrats and four judiciary.

The Governor stated that he had studied the judicial conference as tried out by the United States courts and by the courts of several other states and was convinced that it was

Bu Special Cable

MOSCOW, June 22-Prayda, in a leading editorial alleging Franco-Britain differences regarding the status of the Rhine zone, characterizes the proposed guarantee pact as "rapprochement between Germany and England alone, with a sharp point directed against France, or rather against France and Russia. Commenting on the more active English foreign policy, expressed in the readiness of the British Government to participate in continental combinations, Pravda observes: "This combination is directed against Russia, which the Conservative British Government sees a world enemy and against France which it sees as its nearest and most direct danger." Krassin declares that

the Russo-French negotiations had achieved a certain measure of progress, and asserted that the approxiate agreed figure of the Russian obthe exact amount is still unfixed.

them stands in the water, which laps in the pot and barely covered with about her waist and floats out her cold water. A fire was lighted, and garments. In the foreground a ven- as soon as the water began to boil, the fire was removed except for a few glowing embers. The rice was stirred several times at intervals and left with the cover on in between the stirrings. After about twenty minutes, it had completely absorbed all the water and was beautifully cooked, each grain separate. The Malays sat on their haunches and turned the rice out on to a large leaf, which they held in the right hand while they ate with the left. Mohammedans always eat with the left hand; in fact, each hand has its special duty assigned to it, and they never vary their habits.

Opposite the sand-bank was a small Malay house in among some coconut palms. I beckoned to Sahar and tried to persuade him to climb up and pick a nut. He shook his head, but he crossed the stream, went into the house, and in a few moments returned with a monkey with a coil of string attached to its waist. . . . In about two minutes it was up the tree and looking down at us as much as to say: which nut do you want?" If Sahar had wanted the nut for making a curry, he would have said: "Kuning (yellow)," but as I wanted a drink. he said: "Hijua (green)," and im-mediately the monkey took hold of a large green coconut and spun it around until it dropped off the tree. This monkey is called the brok or coconut monkey, and the Malays for centuries have trained it to pick coconuts. In such a way probably originated the old traveller's tale people. Monkeys and apes certainly do break branches and pick jungle fruits and throw them down, but they usually do this when

The coconut that the brok picked space that is nearly so interesting as head. It was quite fascinating to see Sahar deftly cutting slices Rockwell Kent is one of the really one end of the husk with his sharp typical American painters, for he parang until he came to the coccould have been produced nowhere nut shell. Then Sahar repaid me for else. Combining a powerful love of my joke, because he showed me the exposed shell and suddenly stuck his knife into it, and I got the milk But, for the King of kings' sake, or one that has so direct and obvious ern, he has translated into the ele-straight in the eye. When the milk mental forms of rock, glacier, and had stopped squirting out, Sahar cut freezing water much of that superb a hole in the shell and handed me and romantic gesture towards nature the best long drink I have ever had. Creeps in this petty pace from day in spite of titanic struggles with his more and then handed it to Sahar.

Sahar pointed out to me several coconuts hanging up in a tree which were sprouting. When the Malays plant a coconut, they first hang it not difficult to see that the forced up in the air for two or three concentration on and intimate acmondate the force chosen masto grow; then they dig a hole in the ground and at the bottom place a handful of salt. The coconut is placed on the salt, earth is rammed around ft, and all that is necessary then is to wait for about eight years.

—Carveth Wells, in "Six Years in the Malay Jungle."

> A HALF-CENTURY **EDITION**

SCIENCE and HEALTH

KEY TO THE **SCRIPTURES**

MARY BAKER EDDY

In order to mark in a simple and appropriate manner the completion of a half century since "Science and Health" was first published, the Trustees under the Will of Mary Baker Eddy have authorized the publication of a Half-Century Edition of the pocket-size textbook. This edition has a title-page printed in two colors, and is bound in maroon morocco, limp, round corners, gilt edges, uniform in size with the regular pocket edition. The Half-Century Edition of the textbook will be issued, in place of the black morocco pocket edition for the remainder of the year 1925.

The price of this special pocket edition will be the same as that of the regular pocket edition-namely, one copy, \$5.00, twelve or more to one address, each \$4.75,

Orders and remittances therefor should be sent to

HARRY I. HUNT Publishers' Agent 107 Falmouth Street

Art News and Comment

In Antoine Bourdelle's Studio

Special Correspondence The directions which the art of sculpture is taking in Paris are many. One visits the spring salons and finds a variety of things—amoothly carved delicate busts of the national traditional style, distorted elongated figures, heightened simplification, the angular aftermath of cubism, violently emotional pieces.

To understand great things in art, one must know," says Bourdelle. "I used to go about with Rodin to the exhibits, and from 50 meters away he could tell whether a thing was good or not. Indeed, only a man like Michelangelo or Rodin had the right to mock others, for they are among the very few sculptors who actually knew what they "Statue of Nations," which he has cubism, violently emotional pieces, drollery, cynicism, sentimentality. Some are articulated to the extreme, some scarcely indicate the character of the surface. There is the usual measure of good portraiture, but there is not a dominating undercurrent of anything. There are a half dozen

these directions. One finds Antoine Bourdelle in the midst of many new pieces, preoccupled in a large atelier with the preparations of cartoons, the making of small models, the enlarging, the supervision of stone cutting, casting and all the onerous details of sculp ture making. There are large allegorical pieces, idyllic, decorative pieces, some with fluent, graceful

leaders who have set the pace in

many directions, the rest are free to

ollow their course in any one of

lines, others rugged and sharp.
Through it all, Bourdelle is a romanticist who rises out of the smoke and steel, the realistic philosophy into a world of fancy, of centaurs and sprites, into the legends of ancient times. His imagination is literary, poetic, it continues to believe with the credulity of his childhood in certain symbols of beauty and struggle, and certain inevitable consequences There are the garlands, the dances, the expression of reverence, all so beautiful, so graceful, so lacking in connotations of doubt and misbelief.

For Bourdelle is more a Frenchman than a modern, his pieces in the Luxembourg, rugged and realistic and emotional, with the character of the post-Rodin sculpture, are not entirely removed from the fantastic note that rules the smooth idealistic jocose sculpture of the past century. Bourdelle remains true to his native inheritance, to the vivacity and drollery and overt expression, to the sentimentality and ornateness that exists everywhere in the sculpture in Paris, in the cornices of buildings, in the endless sculptures of the gardens; yes, in the gargoyles themselves.

There is the movement and animation, the swirl of the draperies, festive garlands; there is hope, enjoy-ment, victory, ambition. Every piece has a story to tell, a story of someprogress. There is no feeling of fatality, of lost hope, of retrogres-

STOCK MARKET STRONG SPOTS ARE NUMEROUS

Some Active Issues Move Into New High Ground for the Year

NEW YORK, June 22 (A)-Stock prices opened the new week today with firm tone.

a firm tone.

Buying interest was centered mainly in the motor and northwestern rail shares, but speculative operations also brought moderate advances in a few specialities, such as American Type Pounders, which rose a point to a new high level for the year.

Price movements in the early trading were held within narrow limits, although several popular industries, is

hough several popular industrials, in-luding General Motors, forged into lew high ground. Favorable trade news supplied a firm

indertone for the general market, but the best gains were made by the motors, some of which reached new high levels. Other strong spots in-cluded Pullman, American Ice, Inter-national Telephone, Du Pont and Bosch dagneto. Oil shares gave way slightly

profit taking.

A 12-point break in Italian lire, hich receded to 3.71 cents, featured itial foreign exchange dealings. Other uropean rates also tended lower ugh sterling was steady at \$4.85%.

Professional Operations Operations of professional traders dominated the morning trading, but prices began to waver as a result of heavy profit-taking in American Can, Independent Oll & Gas, American & Foreign Power and Famous Players.

Operators on the long side stemmed the decline by distributing large buying orders in other quarters. General Motors touched 80, a new high record Motors touched 80, a new high record or the year, while substantial gains ook place in Studebaker and a few other issues in which pools are re-corted to be operating.

Although bear traders were in-dined to sell stocks on the theory that the market had gone stale and hat it would be difficult to attract a jublic following at current prices, peculators for the advance found enspeculators for the advance found en-douragement in the fact that com-hodity prices were at the highest levels since February; that prospects were favorable for a continuation of low money until the crop moving sea-son, and that business was generally sood, even though the margin of profit in many cases was small.

Call money renewed at 3% per cent.

Bonds Irregular

Extremely narrow price fluctua-tions marked today's early bond trad-ing. United States Government obli-gations continued to hold within a fraction of the year's best level but falled to attract ailed to attract much additional buy-

Most of the activity centered in industrial liens, where conflicting changes prevailed. National Acme 7½s and Donner Steel 7s advanced a 7½s and Donner Steel 7s advanced a point or more and American Smelting 5s were in demand. Sinclair, Pan American and other oil issues continued to yield on profit-taking.

Announcement was made that Du Pont 7½ per cent bonds, which mature in 1931, would be called on Sept. 1 at 106. The current price of these bonds has been around 108.

ILLINOIS CENTRAL'S 1925 SURPLUS MAY EQUAL \$12 SHARE

Surplus after charges of Illinois Central for the first four months this year was \$4,826,000, equal after divi-dends on \$20,997,000 preferred to \$3,65 dends on \$20,997,000 preferred to \$3.65 on \$120,827,000 common, in excess of a half-year's dividend requirements of \$3.50. For the corresponding period of 1924 surplus was \$6,269,000, equal after dividends on the same amount of preferred to \$5.30 on \$109,522,000 common.

Earnings for the year at that rate should be upward of \$11 without allowance for seasonal variations, which should increase it to upward of \$12, compared with 16,248,000, or \$12,39 on the common in 1924. May earnings should reduce the decrease in this year's surplus because of the generally heavier freight movement.

Loadings in May were 165,984 carloads, an increase of 18,935, or 12.8 per cent over 1924. The system began June with the remarkable increase of 30.7 per cent in loadings for the first week.

QUEBEC GOVERNMENT AND DUKE INTERESTS CLOSE POWER DEAL

TORONTO. June 22—Agreements between the Quebec government and the J. B. Duke interests have been signed which will result in immediate expenditure by the latter of \$40,000,000, and an ultimate amount of between \$75,000,000 and \$90,000,000 in hydroelectric development in Quebec.

Premier Taschereau refers to the plan as the greatest industrial development in Quebec's history. The project includes the development of \$600,000 horsepower at Chute-a-Caron, near the Grande Descharges dam, and the construction of a large aluminum plant. This latter development follows the purchase of the controlling interest in one of the largest aluminum companies by J. B. Duke and E. H. Davies of Philadelphia.

WHEAT AND CORN PRICES ARE LOWER

CHICAGO. June 22 (A)—Influenced by a noticeable lack of aggressive buying, wheat showed an early trend downward in price today.

Opening quotations, unchanged to 1½ c lower, July \$1.54@1.54½, and September \$1.51½ (2.53½, were followed by declines to July \$1.53¼, and September \$1.51%.

Moist, warm weather in the core

September \$1.517a.

Moist, warm weather in the corn belt led to lower prices for corn. After opening at 'a@lc off, September \$1.077a1.083a, the market underwent' a decided setback, September touching a new accordance of the corn of th

Oats sympathized with the weak-ness of other cereals. Starting un-changed to %c lower, September 49% @49%c, oats continued to sag. Provision traders took their cue from the action of grain rather than from hog values.

Brazilian Traction, Light & Power Company for the year ended Dec. 31, 1924, reports net of \$7,638,917 (Canadian currency) after expenses, amortization, reserve, etc., compared with \$6,329,966 in 1923.

SAN FRANCISCO, June 22—San Francisco board of supervisors approved the ordinance authorizing signing of the contract for the sale of Hetch Hetchy Power Company to Pacific Gas & Electric Company. About \$2,000,000 is involved.

Eastern Massachuseits Street Railway reports for May net income of \$40,441 compared with \$43,422 in May a year ago: five months to May 31 net income was \$340,262 compared with \$3551.128.

OTTAWA, Ont., June 22—Asbestos production in Canada last year reached the second highest figure ever recorded, when 226,469 tons was mined. The total shipped amounted to 225,744 tons, valued at \$6,710,830, an average price per ton of \$29.73.

For crude No. 1 the average value was \$411.54 per ton; for crude No. 2, \$200.14; fiberized crude, \$170.14; spinning stock, \$109.04. Other grades, such as shingle stock mill board stocks, paper stock and fillers, and by-products, such as asbestos sand, finish and floats, averaged from \$46.85 to \$6.60 per ton.

Exports of asbestos last year other than sand and waste decreased 20,000 tons. This is largely accounted for by the fact that much of the output is now being utilized by new asbestos factories located in Canada.

FINANCIAL NOTES

Bond Buyer estimates approximately \$30,000,000 in new state loans will come to the New York mar-ket this week.

Ret this week.

Presque Isle, Me., special to the Boston Globe says high grade Aroostook potatoes which have in times rast sold as high as \$10 a barrel are being sold to starch factories at 40 to 50 cents a barrel.

A \$4,000,000 bridge across Tampa Bay, nine miles long, is planned by J. R. Durrance of West Palm Beach, and a \$5,000,000 bridge across Hillsborough Bay, six miles in length, is planned by W. T. McCormick of Tampa.

Say, six miles in length, is planned by W. T. McCormick of Tampa.

Washington special says Fiance will send a commission to United States early in the fall to begin negotiations looking to the funding of the French debt to this country. Information is also received that Czechoslovakia is about to take steps toward funding her debt.

Alien Property Custodian Hicks will withdraw accounts of subjects of enemy governments in private banks and deposit them in treasury, Federal Reserve-Bank to be fiscal agents. About \$276,000,000 is involved and new administration is expected to save \$150,000 yearly. Employees of Washington mills of American Woolen Company have been offered work during their vacations to carry out large orders in bolivias and pompons. It is said that \$5 per cent of workers in the finishing department favorable to the scheme.

United States ranks first among coun-Mo K & T pl 6s C '32

workers in the finishing department favorable to the scheme.

United States ranks first among countries of world in ownership of tankers, having 45 per cent of gross tonnage and 39 per cent of total ships. Country owns 402 tankers with gross tonnage of 2,507, a 854. Great Britain ranks second with 291 tankers and tonnage of 2,074,086.

London Special says unless some compromise is reached in the next few weeks a general strike or a lockout in the British coal mining industry is almost certain. Tuesday owners will submit proposals for a new wage agreement, with a 46-hour week instead of 42 and discontinuance of 14 per cent increase in wages granted recently because of the decrease in working hours.

Canadian imperialists disturbed over apparent fact that British Investing public has largely lost its faith in Dominion and is not doing its part in furthering Canadian development. Canadan Pacific Bulletin states these imperialists point out private investment funds in British Isles are gong into German. Austrian and other foreign channels with the result that Canada is overlooked.

British can strike or a lockout in the parties of the certain can imply industry is almost certain can imply any over the corresponding periods of the corresponding period of 124 and discontinuance of 4 instead of 42 and discontinuance of 4 instead of 4 in a continuance of 4 instead of 4

COTTON STOCKS (Quoted by G. M. Hafford & Co., Fall River, Mass.) Bid Ask

NEW SERIES OFFERED TODAY NEW SERIES OFFERED TODAY
New offerings today included an additional issue of \$2,950,000 Chicago. North
Shore & Milwaukee Railroad Company
first and refunding mortgage 6 per cent
gold bonds, series A. due 1955, at 99½
and interest to yield more than 6 per
cent, and 4000 shares of North Terminal
Corporation of Massachusetts 7 per cent
cumulative preferred stock at \$100 a
share, purchase of 25 preferred shares
carrying a bonus of 8 common shares.

FORM NEW RESTAURANT CHAIN NEW YORK, June 22—A new compeny, to be known as Rutley's. Inc., for the operation of a restaurant chain has been formed here. Capital structure will be 100,000 are Class A stock. Thirty thousand Class A shares are being sold now at \$12.75 a share. The balance of 46,000 shares is held in reserve for purchase at the same price through exercise of 40,000 warrants, given to the management with 30,000 shares of Class B stock.

MORE TEXAS WOOL SOLD

SAN ANGELO, June 22—Weel Growers Central Storage Company concluded
its first sealed bid auction of spring
wool by disposing of 94.355 pounds of 12
months' fleeces and 56.715 pounds of eight months' clips. This brought the
total to 1.397.413 pounds, leaving 600,000
to 700,000 unsold. The 403 lots sold
brought approximately \$700,000 to 250
growers.

NEW YORK CURB

EXPORTS OF INCREASING

Shipments Are Exceeding Record-Breaking Volume of 1924

Automobile saturation, which many feared was approaching some time ago, still seems remote. If that point ever was near, the export market has be-gun to open an outlet which bids fair to provide for all of the United States surplus production.

In the calendar year 1924 automo-tive exports established a record of \$221,000,000, 30 per cent above 1923. Yet it is being easily surpassed. Ex-ports in April were 28,833 cars and trucks, and the value with parts to-taled \$33,000,000. This brings exports for four months of 1925 to \$105,570,-000, almost half the 1924 total.

Production figures in April showed 391,301 cars and 47,664 trucks manufactured in the United States. This outturn no more than kept page with the expanding exports. In April 1924, exports of passenger cars and trucks represented 5.1 per cent of the total production, while in the first four months of this year, notwithstanding the increasing production, exports took 7.1 per cent of all that were turned

The market for the cars of the United States is almost as wide as the world, but principally in undeveloped regions like Latin America and Aus

tralasia. The distribution of the ship-ments in April according to value was

It is not necessary to discuss whether the automobile brings about better roads or improved roads bring in the automobiles. Each reacts on the other. The building of the Acapulco road means Mexico will use more automobiles. The borrowing of \$15,000,000 from the Ford company to build other roads means the same thing.

Given political stability, Mexico soon will be a promising market for automobiles from the United State of the Company of

will be a promising market for auto-mobiles from the United States.

larger purchasing power, mean large imports by them.

Australasia also adds \$,000,000 or 9,000,000 more people to the list and, as the figures show, they are rapidly getting into the automobile habit.

The enormous domestic consumption provides a backlog which the manufacturer of no other country has for export trade. With the great domestic market mass production is possible, placing American manufacturerers in an unusually favorable position to capture the markets of the world for their surplus products.

Realizing took place.

The civil pay to the eight-hour day is the only way to lower costs which would terminate present paralysis in the cwal trade.

French loans were weak and france depressed owing to fears of stability of the present French Government.

Mines hesitated. Oils were unsteady, Mexican oil issues being weak. Rubber stacks were firm.

Industrials, which dropped at the opening, rallied later. Royal Dutch was 32½ and Rio Tinto 38½.

COPPER PLANT IN INDIA

LONDON, June 22—A reduction plant
of 350 tons daily capacity, capable of
turning out about 6,000,000 pounds of
copper annually, is to be erected in the
Singhbhum district of Bengal, Chota
Nagpur, India, by the Indian Copper
Corporation. The Indian Copper Corporation is a reconstruction of the
Cordoba Copper Company, which formerly operated in Spain and paid dividends.

CHICAGO, June 22—National Motor Bus Association has been organized with \$296,000,000 of capital represented as the result of conference of bus operators here.

The Alabama Power Company increased its balance for the year ended May 31, after taxes, to \$4.774.821 from \$3,993,328 in the previous 12 months.

This wide distribution, particularly in undeveloped countries that ship raw materials and buy manufactured goods, shows that in spite of the tariff of 33½ wer cent in the United Kingdom and a prohibitory tariff in Germany, there will still be an enormous world market calling for American-

dom and a prohibitory tariff in Germany, there will still be an enormous world market calling for American-made automobiles.

What Ford Sees

Development of Latin-American countries as well as the Far East will provide a market for an enormous number of automobiles in the future.

The Ford company has aggreed to lend to country, will of course be taken up at country, will of course be taken up at the conference to be held Wednesday, June 24, in Australia.

LONDON, June 22—The market was dull today due to the restrictive influence of fortnightly settlement. Gilt-edge issues were heavy, as were mobiles from the United States.

In all of Latin America there is a population of more than 80,000,000 people whose standard of life is being raised by their increasing exports of raw materials which, giving them a larger purchasing power, mean larger imports by them.

Australasia also adds 8,000,000 or 9,000,000 more people to the list and, as the figures show, they are rapidly as the figures show, they are rapidly way to lower costs which would ter-

DIVIDENDS

Cudahy Packing Company declared the Singhbhum district of Bengal, Chota Nagpur, India. by the Indian Copper Corporation. The Indian Copper Corporation is a reconstruction of the Cordoba Copper Company, which formerly operated in Spain and paid dividends.

CRUCIBLE STILL BUSY

SYRACUSE, June 22—Crucible Steel Company of America is operating at 70 per cent of capacity, according to Chairman H. S. Wilkinson. Business from month to month continues with little change, orders filled one month being replaced by others, so that total unfilled corders remain steady. Mr. Wilkinson believes general business will improve in the near future, with no recession occurring in the meantime.

NATIONAL MOTOR BUS COMBINE CHICAGO, June 22—National Motor Bus Association has been organized with result of conference.

AUSTRIAN EXPORTS TO RUSSIA There has been considerable increase of Austrian exports to Soviet Russia. Especially Austrian manufacturers of scythes, agricultural machinery and kindred articles have resumed business connections with Russia, which before the war was one of their best customers,

SEASONAL LULL IN DEMAND FOR STEEL OBTAINS

Production Better Than a Year Ago, However-Prices, Except Pig Iron, Easier

NEW YORK, June 22 (Special)— Summer has arrived with conditions in the steel industry a little better than average for this time of year. Produc-tion averages 65 per cent of capacity compared with about 50 per cent a

year ago.

Conditions characteristic of summer are noted. For instance, production is being curtailed though not at the drastic rate of a year ago when some mills shut down completely early in this.

and steel prices have a weak complex-ion. Many of those in charge of pur-chasing are starting away on vaca-

for the heavy demand for fabricated structural steel. The awards totaled 50,000 tons which is double the weekly average for 1925. More than half of the hustings of the hustings of the hustings. the business was obtained by the American Bridge Company in three projects; 17,000 tons for the new building of the Equitable Trust Company in New York. 10,000 tons for a new Gimbel store in Philadelphia and 6000 tons for the Famous Players-Lasky York.

Specifications for third quarter ship-ment of tin plate have also been heavy. Demand from the automobile makers has been good; the Ford Motor Company, for instance, having, just bought 50,000 tons of automobile sheets and 5000 tons of cold-rolled

On the other hand the buying on the part of the railroads, usually the best customers of the steel industry, has been disappointing.

June Orders Less One of the large Pittsburgh inde-pendent companies that booked the largest total tonnage in May for more than a year finds that June orders are

than a year finds that June orders are considerably less.

The iron and steel jobbers, whose volume of business forms a good indicator of consumption, report sales very spotty, a good week being followed by a poor one.

Prices of many commodities have been uncertain. Producers have stiffened on their attitude only to weaken again, this being the case particularly with sheets and wire products. The th sheets and wire products. The third price tendency is still downard. The composite price of steel is well 2.439 cents a pound, compared the 2.446 cents a week ago, and 46 cents two weeks ago.

Steel bars are selling at 2 cents a pound, but one maker whose costs are reasonably low, says bars should be selling at 2.40 cents a pound in order that he might make an expected 8 per cent profit. The distributors of steel are in a much batter financial. steel are in a much better financial position than the makers. The jobbers get their regular margin of profit, no matter what the price of steel may be

Pig iron sales are being made at the same good rate of the last the months, and prices have stiffened somewhat, several makers selling at 50c a ton above the recent low. However, prices have not yet moved up in unison, as some makers have not trained the desired backlogs of on.

Th. railroads, heating equipment makers, electrical equipment manufacturers, at cast iron pipe makers are still pick. It is up iron tonnages. One interest has be, seeking 10,000 tons of iron on specul. In. More surplus iron, made original, for immediate conversion into finis, d iron and steel, is being offered on the market in the merchant manner.

Recently it was announced to the Market in the merchant manner.

Recently it was announced to the American Radiator Company had conto sell from its furnace at Buffar.

Now it is announced to the Market in the Mar at Buffan is announced that the A. M. maker of Pittsburgh, has appointed a prominent merchant firm to handle sales of its surplus iron, having previously consumed all of its iron at its own plant.

Scrap Prices Fall Off

Iron and steel scrap, which had been advancing recently, has declined 50 cents a ton in some districts, having been unable to keep up its rising tendency when all other iron and steel commodities were downward-bound. Steel plates have been more active in the east. The largest and most interesting purchase involved 2500 tons for the Standard Oil Company of New Jersey for fabrication into oil storage tanks at Bayway, N. J. Keen competition developed for this desirable order, and a price concession of \$2 a ton was made, or 1.80c a pound, Pittsburgh.

For car floats to be built for the Pennsylvania Railroad by the Sun Shipbuilding Company, 4800 tons of plates will be used. The Chicago Bridge & Iron Works will use 3000 tons of plates for making 15 oil storage tanks for the Andean National Corporation, Ltd.

Steel exporting is in a quiet state. The Welsh makers are underbidding Americans on tin plate for Japan by 40c a box, Americans quoting \$5.70 a box, c. i. f. Japan.

Japanese interests are asking for 10,000 tons of galvanized sheets. The Chicage and other secondhand material from Europe.

Copper Very Active

Copper eclipsed all the other nonferrous metals as to activity during
the last week, and the price rose %c
a pound to 13%c, delivered in the
Connecticut Valley, the first advance
in more than two months. Probably
a total of 100,000,000 pounds was sold,
the greatest amount over so short a
period of time in the history of the industry. The books of producers have
been filled for some time ahead.

The copper demand was chiefly on
the part of domestic consumers, sales
for exporting having been almost
neglected, and prices for export having
been under those for domestic shipment.

Lead, which a month ago was skyrocketing, has been declining during
the last week. For the first time in
several weeks the American Smelting
& Refining Company reduced its price
by \$2 a ton to \$.30c a pound, New
York, prices in the outside market
being \$.20c, New York, and 7.85c. East
St. Louis. The paint makers report a
falling off of business, but the battery
and cable makers are still doing very
well.

Zinc has been hovering around 7c a

BIG GAIN IN TIRE OUTPUT

Shipments of Balloon Type Establish New High Record

The growing popularity of lowpressure automobile casings was again reflected in April shipments of balloon trees, which established a new record for any month.

Deliveries totaled 1.448,974, compared with 1.168,277 in March and only 141,272 in March, 1924, according to the Rubber Association of America, representing 75 per cent of the industry.

Demand from authorized to the second from the

Demand from automobile manufac-turers for balloons to be used as origiequipment continues unabated, orders for replacement are be-

and orders for replacement are begining to gain ground.

Production also increased in April,
at 1.626,369, compared with 1,217,367
in March and 406,807 in April, last
year. At the same time close watch
was kept on inventories. April 30
they totaled 1,080,594 casings, or approximately 0.7 month's supply. At
the close of March inventories were
926,303 and at the end of March, 1924,
116,433.

In April shipments of high pressur pneumatics, cord and fabric, exceeded production by 295,611 casings. Total shipments were 2.674,701, compared with 2,324,702 in March and 2,778,224

with 2,324,702 in March and 2,773,224 in April a year ago.

Figures for the end of April showed a further decline in inventories of cord and fabric tires. Manufacturers are endeavoring to avoid over-production of high pressure casings. They desire to be in position to swing into full production of balloons if this type makes production of cords and fabrics no longer necessary on a large scale.

April 30 inventories totaled 5,735,760. compared with 6,205,901 March 31 and 5,870,820 April 30, 1924.

The outturn of high pressure tires

5,870,820 April 30, 1924.

The outturn of high pressure tires in April also showed a decline at 2,379,090 compared with 2,739,564 in April also showed a decline at 2,379,090 compared with 2,739,564 in April 1924.

Production of high pressure inner tubes was also curtailed. In April they amounted to 3,259,524, a decrease of 636,164 from March and 486,356 from April a year ago. Inventories decreased to 8,726,603 from 9,540,993 at the end of the previous month, but were 353,080 higher than April 30, 1924. Shipments were 3,556,258, compared with 3,120,624 in March and 3,429,334 in April last year.

Shipments of solid age contributed and applies of solid age contributed and significant and 3,429,334 in April last year.

pared with 3,120,624 in March and 3,429,394 in April last year.

Shipments of solid and cushion tires in April were the highest since May, 1923, totaling 70,950, compared with 69,833 in March and 58,486 in April a year ago. Production also increased over the previous month at 66,059 solids and cushions, compared with 56,751 in March and 69,534 in April, 1924, At the end of April there were on hand 166,389, a decrease of 9621 from March and 46,030 under the end of April, 1924.

It is estimated that rubber and tire It is estimated that rubber and tire manufacturers in April consumed 48-154.633 pounds of crude rubber, compared with 46,365,630 in March.

These figures cover crude rubber used in making casings, tubes, solid and cushion tires. Cotton fabric used in April, however, was 133,272 pounds less than the previous month, at 14,-902,337 pounds.

PROFESSOR FISHER'S INDEX OF PRICES

factor in keeping Philadelphia in the ead. Instead of the general tightening

The hitting in the league this year, according to Manager Cobb of Detroit low in Boston, is due to the lively hall rather than to any unusually poor pitching. It is larger and has much more bound to it, he told a representative of The Christian Science Mont-tor, Saturday. Although this ball tends to give more action to the games, it is going to have a bad effect on pitching

"The pitching, however, is bound to tighten up before long," said Man-ager Cobb. "Detroit has had a hard time getting under way this year, due to ineffectiveness of the pitching staff with the lively ball. This is the hardest-hitting season that I can recall in all my career. If velory rested on hitting alone, however, Detroit would win the pennant this season without

Senators' Staff Strong

In this season of hitting, however, fans must not overlook the effective work of the Washington pitching staff. Even last Saturday, which is taken as a good example of hitting when practically every club was being hit hard, Coveleskie of Washington held St. Louis to six hits and one run. Of course, there have been flashes of great pitching by every club, but the most consistent and most brilliant. most consistent and most brilliant pitching this year has come from Washington. Washington last week won four games and lost two. Washington's opponents made only 51 hits during the week. Philadelphia maintained its lead in the league through tremendous hitting. Philadelphia made 75 hits, while their opponents made 69. This gives some idea of the relative hitting and pitching of the two biggest pennant contenders up to date. The fact that Washington played six games last week and Philadelphia played only five brings out clearly the greater hitting power of the Athletics and the greater pitching quality of the nd the greater pitching quality of the

to maintain fts lead is seen by its many last inning rallies all through the season. Last week in the eighth inning against Cleveland they scored 13 runs in the eighth inning to overcome a big lead. Saturday the team made six runs lead. Saturday the team made six runs in the seventh inning to win. It looks all abama had ever had a player in the and good pitching by Washington. Perlook like an interesting one if these teams continue as chief contes-

one of the features of the past week's play. The Tigers won five straight games. Philadelphia, Washington and Detroit were the only American League teams to win a majority of their games since last Monday. Bossial results and the straight for t ton won three and lost four: Chicago won three and lost five; New York won two and lost four. The hitting of Ruth has enabled the Yankees to recover somewhat from their bad start and play nearly .500 per cent baseball. Cleveland and St. Louis are in very bad slumps, the former having won only one and lost six, while the Browns won one and lost five in the last week

MISS HARRISON IN TEST

BOLOUGNE, France, June 22 (P)—
Training for her cross-channel swim, which she hopes to undertake this summer, Miss Lillian Harrison of Argentina swam from Capt, Grist-Nex to Sangatte, a distance of about eight miles, in 4h. 20m. Saturday, T. W. Burgess, who is training Miss Harrison, says that who is training Miss Harrison, says that she is showing excellent form.

Yale Nine Winner of 'Big Three' Title

Pond Pitches Team to Victory Over Tigers, 10 to 9, Ending Colorful Career

FINAL BIG THREE BASEBALL STANDING Won Lost For Agst P.C.

4 1 62 39 .800

1 2 2 26 25 .600

1 0 4 25 59 .000 Yale 4 Princeton . 3 Harvard . 0

NEW YORK, June 22-Yale University closed its season of major sport athletics here Saturday afternoon for 1924-25 in glory by defeating the Princeton University nine 10 to 9 for the championship of the "Big Three" baseball series. Recorded in Yale's book of records are victories over Harvard and Princeton in football, hockey, and baseball, losing only to Princeton in track. Numerous minor sport vic-tories are also written in the Yale book over its two chief rivals.

Individual honor was also derived Cleveland at Washington.
St. Louis at Philadelphia.

Tremendous hitting continues to be the big feature of the race in the American League as well as the big factor in keeping Philadelphia in the more numerously than Caldwell; but his ability to tighten when need be

lead. Instead of the general tightening up in the pitching as fans had expected about this time, the batters appear to be increasing rather than diminishing their averages.

An idea of the terrific batting onslaught which is apparently on its way to new records in the league annals, is given by a fook at the Saturday games. On that day with all American League clubs playing, 104 hits, and 54 runs were made.

In ability to tighten when need be saved many possible Tiger scores and then his batting counted heavily when in the first inning scoring four runs which it increased to six in the third inning. Princeton gathered one in the green day with all American League thus playing, 104 hits, and 54 runs were made. when errors by Yale, and Tiger hits produced three.

The Eli, in the first half of the ninth, pounded out hits for three runs, making the Yale lead four runs. In the last half of the ninth inning. with the bases all occupied, J. W. tie the score.

Yale came to bat in the tenth inning with determination after having twice obtained what looked like comfortable only to see the Tigers cut them W. H. Neale Jr. '258 tripled and ond climaxed his brilliant career of baseball and football at Yale by sending out a long sacrifice fly, scoring Neale for the run that won the game as the Tigers failed to score in their final chance. The score by innings: Batteries—Pond and Lovejoy; Caldwell and Lackey, Thompson. Umpires—Dignan and Starke. Time—3h. 10m.

CRISSMAN NEW GOLF CHAMPION

PITTSBURGH MAY Cambridge Feat SOON TAKE LEAD

Second Place Holders Win Five Games Last Week and Gain on Giants

NATIONAL LEAGUE hicago ...

RESULTS SATURDAY Boston 11, St. Louis 10. Pittsburgh 21, Brooklyn 5. Cincinnati 4, New York Philadelphia 3, Chicago RESULTS SUNDAY Boston 7, St. Louis 3. New York 4, Cincinnati 3. Chicago 3, Philadelphia 2. GAMES TODAY No games scheduled.

The steady progress of Pittsburgh and St. Louis and the return to effec-tiveness of Cincinnati's pitching staff marked the features of the past week in the National League. Pittsburgh. apparently determined to displace the league-leading New York Giants, has gained more ground on the chamonly a fair showing against Brooklyn, have lost decisively to Pittsburgh while the latter club has won against both teams.

Red's Staff Returns

Kirkwood brought in a card of 79.

John Bredemus, the fourth American professional aspirant for the British title, scratched, as did Douglas Grant, the American amateur star who more encouraging to fans who had watched the Giants get off to a big lead without apparent effort. But look at the Red's pitching staff.

holes will qualify and that 160 will comes the cry from Cincinnati, Last possibly put entrants among the elect. Monday, Donohue held Brooklyn to Smith and Barnes, if they do as well tomorrow as they did today, will be well within the limit, but Kirkwood cannot do any worse without failing to the champions to the champions without failing to the champions with the champion with the champion with the champion with the champion with the ch to five hits. Thursday, May and Benton Barnes' card represented rather erratic golf, especially in his drives. His recoveries generally were excellent, however, and his putting on the slick greens was consistently good. An orratic golf, especially in his drives. His however, and his putting on the slick formance, and although losing his formance, and although losing his however, and his putting on the slick greens was consistently good. An ordinary round tomorrow should enable the Pelham professional to qualify. Half of the field of 200 had finished when Barnes' card came in. Dick May of Newcastle-on-Tyne led with 70. son of heavy hitting.

Glants Lose Ground

as the favorite for the British title this year, went out in 36. He was not using his irons well, but he played brilliantly but enough to enable Pitts-burgh of Selma, Ala., will rest the golfing laurels of the south for the next year following his defeat of S. E. Foster, Jacksonville, Fla., 3 and 2, here, Saturday, in the 36-hole finals of the Southern Golf Association's twenty-third annual amateur championship tournament.

Crissman took an early lead on Foster, and ended the first 18 holes, 2 up, is the favorite for the British title this year, went out in 36. He was not using his deway not using his irons well, but he played brilliantly but enough to enable Pitts-burgh to decrease the leader's advantage from 4½ games, last week to two games today. The leaders won three and lost four, last week, while Pitts-burgh won five and lost only one Brooklyn, with Vance in the box, managed to give Pittsburgh its only defeat, while the second-place holders retailiated by winning the other three games of the series. Cincinnati won four and lost three series. Cincinnati won four and lost the second-place holders retailiated by winning the other three games of the series. SWEETSER WINS THE METROPOLITAN TITLE

DEAL, N. J., June 22 (AP)-J. W. Sweetser, former United States cham-pion, Saturday defeated L. M. Lloyd of Greenwich, Conn., in the 36-hole final round for the metropolitan amateur golf championship, 6 and 5, over the Hollywood Country Club links. Sweetser got away to a fine start in the morning and reached the first nin 427 4 up. Lloyd was repeatedly in trouble and could not get going. On the in-coming nine Sweetser adde two more holes and went to lunch 6 up. Sweetser came within two strokes of tying the course record. His card read 72 miss Glenna Collett of Providence, R. strokes for the morning round.

L. failed today to repeat her victory

This is the second time that Sweet-ser has won the Metropolitan title. In 1922 he defeated G. E. Hale of Upper GILMORE DEFEATS COSTELLO PHILADELPHIA, June 22—For the third time this season W. E. Garrett Gilmore, of the Bachelor Barge Club, 1935 United States sculling champion and Olympic finalist against Jack Beresford Jr., today defeated Paul Costello, his Philadelphia rival, in the seventy-second annual Schuylkill navy day results.

an Unusual One

Scores 427 Runs for Four Wickets in Second Innings Against Surrey

By Cable from Monitor Bureau everything else in the batch of first-class cricket matches recently con-cluded was Cambridge University's feat of scoring 427 runs for four wick-ets at the Oval here in the second innings against Surrey, and so win-ning by six wickets a match that at the start of the last days' play they appeared tolerably certain to lose. Never before has so high a figure been reached for so few wickets in the fourth innings of a first-class game, and only once has it been exceeded for a full fourth innings in England. Curiously enough that was also by a Curiously enough that was also by a Light Blue eleven, which hit up 507 runs for seven batsmen out against the Marylebone Cricket Club at Lord's 29 years ago. The highest fourth in-

apparently determined to displace the league-leading. New York Giants, has gained more ground on the champions, until now only two games separate them from first place.

Pittsburgh defeated the Giants four straight games in their last meeting. This, coupled with the fact that Pittsburgh is having equal success.

But the Oval played brilliantly and none more so than K. S. Dulcepsinhji, who more so than K. S. Dulcepsinhji, who it is thought show quite as great batting ability now as his illustrious urcle, K. S. Ranjitshhji, known to all cricket followers as "Ranji," did at a corresponding period of his career.

D. R. Jardine, Surrey captain for this game, changed his inadequate went in the control of the This, coupled with the fact that Pittsburgh is having equal success against Brooklyn, means much to against Brooklyn, means much to pittsburgh fans. The team was just as effective against the Giants, last year, but failed to defeat Brooklyn at year, but failed to defeat Brooklyn at year, but failed moment. The Giants, althe crucial moment. The Giants, althe crucial moment of the first man to go, made 66. the crucial moment. The Giants, although losing to Pittsburgh, defeated though losing to Pittsburgh, defeated though losing to Pittsburgh, defeated the property of the control of the con though losing to Pittsburgh, defeated Brooklyn decisively in the season's games of 1924. Therefore, Pittsburgh failed in its efforts to displace the Giants. This year, the Giants have made only a fair showing against when Dawson was caught in the slips off W. J. Hitch. He had been at the wicket four hours, and made an invaluable 125.

Duleepsinhji was bowled when only two runs short of the coveted "century" and L. G. Crawley was run out after adding 50 in fast style. Then H. J. Enthoven, R. J. O. Meyer, with 20 The remarkable return to form of the Cincinnati pitchers, which has enabled the team to regain a promising position in the first division, and the good showing of the Cardinals since Hornsby became manager contains the prospects of something betains the prospects of something the prospects of somet

Another remarkable occurrence in this game was the scoring of two separate centuries by J. B. Hobbs. The Surrey star had done this once before in 1909, and has now 121 three-figure innings to his credit—five fewer than Dr. W. G. Grace's record total, which Hobbs hids fair to eclipse this season. He made 104 out of 344 in the home sides first innings and 143 not out, out 260 for seven wickets declared in e second. Cambridge's first venture realized only 179.

The standing in the county championship shows no noteworthy change. Champion Yorkshire, the only undefeated side this season, heads the table with 92 per cent, Lancashire lies sec-ond with 80. Surrey and Middlesex, "hopes of the south," are third and fourth. Kent, which lost to Middlesex by an innings and 18 runs, has been edged out of fifth place by Notting-hamshire. The match at Lord's was remarkable for the great knock by E. H. Hendren, who contributed 240 not out to Middlesex's 488. The Kentish men were dismissed for 247 and 227. Unlike Yorkshire, Lancashire had to

of fight hard against the Essex eleven, which made a big score of 334 for three wickets in the second innings—a greatly improved player, C. A. Cutmore, scored 134 not out—and really took the honors of the game. However the Lancastrian's 431 for five wickets declared in the opening venture gave them a first innings lead of 138, and incidentally three points in the Yorkshire's win over little Glamor-

ganshire by an innings of 136 runs was a very simple affair. Percy Holmes, Herbert Sutcliffe and Emmott Robinson all made centuries, and the ns first innings declared cl

pavilion for 93 in Gloucester's second innings, and although the opponents fielded brilliantly Sussex obtained the required 145 runs for the loss of only five wickets.

PHILADELPHIA, Pa., June 22 (AP)

-Eight seeded players in the United defeated Worcestershire by seven wickets, scores Worcester 161 and 110, ment, which opened at the Merion Notts 173 and 100 for three wickets; Cricket Club, Haverford, today, faced Warwickshire defeated Leicestershire stern competition, and were forced to show their best in the first round of 229, Warwickshire 148 and 245 for six wickets.

LACROSSE NOW

Made Minor Sport, Schedule Under Way

HANOVER, N. H., June 22-Following its commencement meeting, the Dartmouth Athletic Council an-nounced Saturday the adoption of la-crosse as a minor sport. This old In-dian game was instituted as a recreadian game was instituted as a recrea-tional activity during the last few months, and the enthusiasm it aroused prompted the authorities to place it on a par with other sports. The team will be coached by T. J. Dent, who is also the soccer mentor. Arrangements for drawing up a schedule with east-ern colleges will get under way imme-diately. The official list of football coaches

for next fall was ratified as follows:
J. B. Hawley '09, head coach; assistant coaches, J. L. Cannell '19, N. G.
Crisp '21, E. B. Lynch '23, and C. G.
Aschenback '24. Baseball leters were also awarded, to the following: Capt. H. B. Bjorkman '25; R. C. Comeford '25; F. H. Edwards '25; H. L. Fleet '25; R. E. Fox '25; D. F. Harris Jr. '25; H. E. Hudgins '26; W. P. Elliott '27; F. M. Owl '27; R. J. Michelini '27; F. M. Owl '27; R. J. N. Stevens '27

MLLE. BELLET WINS MEDAL PLAY TROPHY

Strokes for the morning round.

Lloyd's playing improved in the afternoon, but it was not good enough to hold off the expert playing of Sweetser. The match came to an end on the thirty-first hole, when Sweetser won in par 4.

This is the second time that Sweetcould do was to finish third. Pauline de Bellet of France, the runner-up in France's national cham-pionship and semifinalist in the international tournament last week, won the event with a score of 78. Mrs. Fowler of England was second, with 79. Miss Collett's card showed 81, but the American girl had the satisfaction

ILLINOIS A. C. WINS TRACK MEET

Team Scores 145 Points in C. A. A. U. Championships

Special from Monitor Bureau CHICAGO, June 22-For the fourth year in succession the Illinois Athletic LONDON, June 22—Overshadowing Club is in possession of a majority of everything else in the batch of first-Club is in possession of a majority of and field games of the Central Association of the Amateur Athletic Union of the United States. New athletes, recruited by Director J. W. Behr, played a big part in scoring the team victory, 145 to 53 over the Chicago Athletic

Association.

New Central records are ready for the books in three events, the 440-yard high hurdles, the pole vault and the javelin throw. Raymond Hass, an I. A. C. recruit from Georgetown University, made a bid for individual honors by taking first in the 120-yard high hurdles, first in the 440-yard high hurdles, and second by a close margin in the 220-yard low hurdles for 13 points. Hass set the new record in the

Sydney during the season of 1997 and 1998.

Everyone of the six men who had a hand in Cantab's fight against time at the Oval played brilliantly and none more so than K. S. Dulcepsinhil, who it is thought shows. The summary:

New York Will Have HARVARD WINS

Thirty-Three Track and Field at National Meet

NEW YORK, June 22-Thirty-three

NEW YORK, June 22—Thirty-three track and field stars, among them some of the foremost college and club athletes of the country and representing one of the strongest athlet's squads it is possible to assemble, showed performances which qualified them to represent the Eastern district in the Metropolitan A. A. U.'s national championship track and field tryouts, held at Travers Island Saturday.

On the squad the Mercury Foot of held at Travers Island Saturday.
On the squad the Mercury Foot of the New York A. C., which easily won the district team championship, will predominate. The local championship committee at a special meeting immediately following the Travers Island meet awarded to the Mercury Footers 12 places on the team, whose expenses will be defrayed by the A. A. U. In addition there will be 10 extra men which the club will send west for the crucial test in the struggle for the team championship against the coast's ting in its usual form by the end of

galaxy of stars, giving the New York
A. C. a representation of 22 on the
team. The summary:

PICK-UPS

turns from the base line, but his backhand strokes were well handled. He had little difficuity with his Dutch opponent in the final two sets.

Henri Cochet of France defeated J. C. Gregory of England, 6—4, 6—2, 6—0.

Rev. W. H. Maitken defeated P. R. Rhurditch, an American student at Oxford, 6—3, 6—4, 6—0.

Tennis stars of six nations were gathered around the famous center court early this afternoon when the first round competitions of the forty-sixth British tennis classic began. The covered stands which entirely surround the center court upon which the leading matches are played, were hardly half full. Despite the drought of the last month the turf seemed to the head of inexperience.

GERMAN SPRINTER WINS

be in good condition, although harder than usual.

UNITED CHURCH TO RAISE FUND TORONTO, Ont., June 20 (Special Correspondence)—A campaign will be commenced by the United Church of Canada to raise \$4,000,000 before March 31, 1926. The fund will be known as the United Church Maintenance and Extension Fund, and will be applied to missions and social be applied to missions and social control of the Hollander. SCOTLAND DEFEATS ENGLAND NEW YORK, June 21 (P)—Scotland defeated England, 2 to 1, here, today, in the final round of the annual international soccer competition of the New York Footballers Protective Associations

Fine Athletic Team BULLARD TROPHY

Stars to Represent District At Top Speed Crimson Polo Four Brushes Army Aside for College Title

RYE, N. Y., June 20 (P)—Playing with perfect co-ordination at top speed, the Harvard University pony polo team defeated the United States Military Academy by a score of 8 to 3 in the final game of the intercollegiate tournament at the Westchester-Biltmore Country Club Saturday, winning the General Rullard collegiate cham-

team championship against the coast's ting in its usual form by the end of

stickwork were responsible for the Army's three goals, Hale being credited with two and Baldwin one Stranahan at No. 1 was Harvard's chief goal getter, and accounted for five of his team's eight marks, with each of his teammates scoring once. The summary:

ARMY Score—Harvard University 8, United States Military Academy 3. Goala—Shanahan 5, Shaw, White, Pony for Harvard: Hale 2, Baldwin for West Point, Referee—L. E. Stoddard, Umpires—Capt. O. I. Holman and J. M. Lapham, Time—Six 7½m. chukkers.

Richards Again

favorites, Tilden rose to brilliant heights and carried Chapin with him

to a spectacular victory.

On Saturday Tilden defeated Richards in a benefit match at Forest Hills, N. Y., 6-3, 8-6. The rivals then teamed for a dochles match against R. N. Williams 2d and W. M. Washburn, thus bringing to-gether two former championship cominations. Each team won a set, Wiliams and Washburn taking the first

In other matches, Washburn defeated Dr. G. T. King, 6—3, 6—4, and Williams won over F. T. Hunter, 6—4, 6—4. Dean Mathey and Takeichi Harada divided two sets, the former winning the first, 6-4, and the latter reversing the figures in the second.

There was also a second doubles contest in which Harada and Zenzo Shimizu lost to Karl Behr and Mathey,

W. J. THOMPSON WINS

ANOTHER GOLF TITLE TORONTO, Ont., June 22 (Special)

—W. J. Thompson of the local Mississauga Club, who has been an outstanding figure in Canadian golf for the last seven years, added another title to his rather lengthy list on Saturday when he defeated Donald Carrick of Scarboro, 4 and 3, in the final for the Ontario amateur tile. Thompson was the defending cham-

pion, and in his four matches won by 6 and 5, 6 and 5, 4 and 2, and 4 and 3.

He won the Canadian amateur title in

1923, and has won the qualifying

round medal in four of the last five years in the Canadian amateur, losing in 1923 by one stroke to his brother Stanley. He won the qualifying round medal score in the Ontario tourney on Thursday, making it three times in He is in great form for the Canadian amateur which opens on June 29 in Ottawa. His brother Frank, the present Canadian champion, is in Florida and will not defend his title. G. S. Lyon of this city, the grand old man of Canadian golf, won the final in the

second flight yesterday having to play six extra holes to get the decision from J. H. Firstbrook, a club mate. MRS, STENZ WINS NEW YORK, June 22-Mrs. B. F. Stenz, twelfth ranking player in the country, won the women's metropolitan clay court championship in the final round of the tournament at the Uni-

CARDINALS GET OUTFIELDER ST. LOUIS, June 22 (27)—Clyde Day, pitcher, and C. J. Hafey, outfielder, have been traded by the St. Louis Cardinals to the Syracuse club of the International League in exchange for southpaw Arthur Reinhart. Day is released outright, while Hafey goes under option.

KOUPAL GOES TO KANSAS PITTSBURGH, June 22 (P)—Louis Koupal, right-handed pitcher purchased from the Omaha, Western League Club, by the Pittsburgh Nationals, has been sent to the Kansas City, American Association Club, under special option. He may be recalled on 48-hours' notice.

COLLEGE BASEBALL RESULTS

74-76 METER BAND USED BY SIGNAL CORPS

Ten Channels Available With Good Separation at These Frequencies

Interference, the more or less technical term applied to the intru-sion of one radio wave upon another at a receiving station, is an avoidable condition, according to R. E. Thompson, eminent radio en-gineer, in a statement that the problems of interference can be solved as it has been done in other branches of wireless communication. His statement, together with his description of how an equally hard prob-lem of interference was conquered for the Signal Corps of the United States Army, is related here for the

Mr. Thompson states that in his opinion all necessary radiocasting stations can be simultaneously operated without interference if the type of transmitting apparatus and the type of receivers sold are brought up to the necessary degree of selectivity, and the proper wavelengths are chosen, extending where neces-

sary down into the shorter range.

Illustrating this point, he tells how, shortly after the war ended, his organization, which was formerly the organization of the Wireless Im-provement Company, was called in by the Signal Corps of the United States Army and acquainted with the necessity on the part of the Signal Corps to obtain entirely new equipment for the radio division, which equipment must permit the operation of a great number of code transmitters and receivers simultaneously, right along side of each other. Receivers must be capable of receiving from distant stations while perhaps nine or ten transmitters were sending, all located not within a few miles but within a few feet of the receivers.

It was explained that all this communication must be carried on within a range of wavelengths where the longest was only two meters different from the shortest. In other words, for reasons of their own, the Army wanted 750 transmitters and receivers, and the maximum wavelength permitted was 76 meters, while the minimum perm'tted was 74 meters, yet a receiver must be capable of operating with at least nine transmitters all going full tilt within a few feet of it. It looked then and it looks now like an almost impossible job, and yet it was accom-

The sets consist of a combined code transmitter and receiver using the same tubes, batteries, etc., for transmission and reception. The wavelengths of the transmitters are separated by one-fifth of a meter only, giving 10 wavelengths between 74 and 76 meters, the range allowed: The aerial used is a loop made up of The aerial used is a loop made up of one turn of heavy brass rod approximately one-half inch in diameter and automobile camping. 9—Dance music, Bill Tasillo's orchestra. enclosing an area of approximately nine square feet. The sets are all portable and can be set up for operation in less than one minute. Two-way communication is provided by a break-in system which allows a receiver to interrupt the transmitter at will.

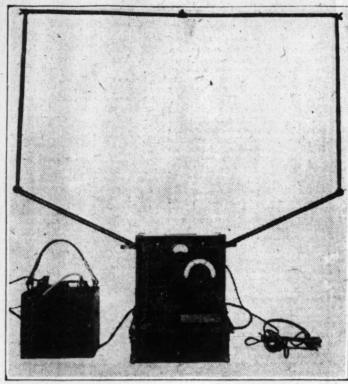

These sets are known as Signal

Corps SCR 77 Sets and wherever a radio show of importance is held, the Signal Corps usually has a display booth. Invariably these sets are on exhibition, but in order to get their story, the men in charge will have to be asked as they do not volunteer information relative to the sets they exhibit as readily as do the commercial exhibitors.

DOMINION DAY OUTING

Dominion Day will be observed by the Canadian Club of Boston and its woman's auxiliary by an afternoon and evening outing at Norumbega Saturday. A baseball game between the club team and Vimy Camp of the Canadian Veterans | 8 will be a feature of the program.

Henry Had a New Cap ENRY had a new cap, of which | monkey-caps to the children. They yellow, and it had cost his father printed on them. And today Henry nothing at all. Mr. Smith, the gengot one and tomorrow I suppose erous grocery man, of whom Henry's he'll want to wear it to school. mother bought groceries for the fam. "I saw him in it," said Henr ily, had given this cap to Henry father. "I remember when was a when he came to the grocery store boy I had a cap something like it to do an errand for his mother, and myself."

Henry had put it in his pocket and O course there isn't any real hat and put on his new cap.

He had hoped that perhaps Mr. Smith would give him a cap, for Mr. Smith had given similar caps to sevboys. Such was Mr. Buy Your Groceries at Smith's."

as he got home. He looked at himself in the hall mirror, and he could self in the hall mirror, and he could not but feel that it was a very at-day, and all the next day, and part tractive cap. It was a perfectly of the day after that. And then that round cap, but when he looked at afternoon he took his everyday hat the words. "Buy Your Groceries at off the hat rack because it happened Smith's," he knew that the words to be the easier to reach. And when ought to be in front, so he put it he got to the vacant lot to play ball, on that way. And a few minutes he might have noticed that several later he was playing baseball with other boys had on their everyday several other small boys, nearly all hats again. But Henry didn't notice of whom had on caps that Mr. Smith that because he was too much inhad generously given them.

The odd thing about it was that

in better business than giving those the generous groceryman.

he was quite proud. It was of look perfectly ridiculous going round with Buy Your Groceries at Smith's "I saw him in it." said Henry's

hurried home as fast as he could so harm in his wearing it," said Henry's that he might take off his everyday mother. "But he does look ridiculous going around and advising people to buy their groceries at Smith's."

That is the way parents are. They have their own ideas about your clothes, and sometimes their ideas Smith's fondness for children. And are quite different from your ideas. then, too, there was Mr. Smith's But Henry's father only said to name on the cap. For it said in red letters on one of the white places—

Henry, "Well, son, I see you've got a new cap." And the rext morning, when Henry asked if he could wear his new cap to school because all the Henry put on his new cap as soon other boys were wearing them, his mother said he might.

but when he looked at afternoon he took his everyday hat terested in playing ball.

The odd thing about it was that When he got home he didn't even Henry's mother didn't like Henry's notice that his cap with "Buy Your Groceries at Smith's" on it had dis-'I must say," said Henry's mother appeared off the hat rack. For that to Henry's father, when he came it the way with such caps. It just home from his office in the city, disappeared, and nobody ever men-"that I think Mr. Smith could be tioned it again, not even Mr. Smith.

Schenectady Sends on 38-109-380-1660 Meters

Special to The Caristian Science Monito

Schenectady, N. Y., June 22 THE General Electric Company I is now using four wavelengths for all its broadcasting: WGY on 379.5 meters; 2XAF, 38 meters; 2XK, 109 meters, and 2XAH, 1660 meters. The last three groups of letters designate special experimental licenses, and the duplication of all the programs commonly credited to WGY is possible by the recent competition of a \$100, 000 experimental broadcasting sta-

This has been built several miles from the main plant of the General Electric Company, substituting a high elevation, remote from railroads, steel buildings and electrical machinery for the original radiocasting station which is in center of the main works of the company.

One of the features of the new station is a series of antennæ of varying lengths and elevations. General Electric engineers are conducting an exhaustive search into the problems of transmission under all conditions of service, daylight and darkness, summer and winter, and with various degrees of power. Radio fans who are equipped to receive the higher and lower wavelengths are asked to report to the engineers on their reception, with special reference to quality, fading and strength of signals.

EDITORIALS

In clear and emphatic language, Aristide Briand has publicly stated that France fully

Two Aspects of the Debts Problem

recognizes its debts and does not in any circumstances intend to evade them. This is an important pronouncement, and if it is given a definite diplomatic form, it will go far toward dispelling the doubts which have

been aroused in the American consciousness of France's good faith. It is not unnatural that there should have gradually grown up a belief that France, in reality if not in theory, meant effectively to repudiate its obligations to England and to America. This belief was fostered by a good deal of loose talk about the common cause. Unquestionably there is a sense in which all the nations who were engaged in war against Germany had a single purpose. But the thesis of the common cause is pushed too far when it is pretended that the various countries had precisely the same interest in the successful prosecution of the war as had France.

For France the winning of the war was a matter of vital concern. England was also deeply committed to a particular conclusion and was conscious that its position in the world would be greatly changed were not victory to crown the struggle. Nevertheless, England was interested to a lesser degree than France. America, though forced to take up arms, was interested to a still lesser degree. In short, the allies of France had mixed motives. They were to some extent protecting themselves, it is true, but they were also to some extent gratuitously throwing their weight on what they considered to be the side of justice. These distinctions must be drawn when the thesis of the common cause is pressed

It is obvious, however, that in dealing with a debtor who has been placed, through no fault of his own, in the most uncomfortable position, there is room for the utmost leniency. If it is not possible to cancel the debt; if it is not possible to listen with complete patience to the argument that because America—and of course England-have done much, they are therefore obliged to do more; it is, on the other hand, extremely desirable that readjustments should be effected and that such generosity as is compatible with the elementary notions of financial integrity should be displayed. What has done France more harm in the eyes of the Anglo-Saxon countries than anything else is the equivocal attitude which it has assumed on too many occasions. It has seemed to demand as a right the obliteration of its debts, and it has seemed to represent America in particular

Nobody who is acquainted with the French financial situation can for a moment expect that France will meet the legitimate claims upon it in any considerable proportion for a number of years to come. It is not the actual payment of impossible sums that is called for by the creditors of France. But what they do call for is the real recognition of unquestionable obligations. After that, the funding of the debts will be a matter of mutual agreement.

in the rôle of Shylock.

To put the matter in its simplest form, the debts problem divides itself into two distinct parts. There is, first, the imperative request for a recognition and not a repudiation of the debts. There is, secondly, an undoubted desire to treat the debtors with a certain amount of leniency. If once the suspicion that France is not endeavoring to dodge the issue can be disposed of, then the subsequent discussions will be easier. There cannot be, in the present stage, any discussion of the fact of indebtedness. In so far as France has refrained from giving the most positive assurances of its ultimate purpose; in so far as France has employed specious reasoning, France has irritated some of her best friends. Still, one must remember that on no occasion has a responsible French statesman gone so far as to dismiss the claims of France's creditors.

M. Loucheur, who was not at the time holding any office, did, indeed, make a speech which was interpreted to mean that France could not or would not pay. But at a later date M. Loucheur issued a complete disclaimer, and it may be taken that this disclaimer applies to all the deductions that have been drawn from unauthorized and somewhat loose expressions of private members of the French Parliament. In a negative way, therefore, America had already received some satisfaction. Now in a more specific manner, M. Briand has announced that France shoulders its debts. It is a point that deserves the utmost emphasis. It is already

a long step on the way to a settlement. When we turn, however, to the possibilities of payment in the near future, it must be confessed that the prospects are not over bright. M. Caillaux is struggling with difficulties which are not of his making. All the finance ministers of France since the war-and even during the war-are to blame. They pinned their hopes on immense reparation sums from Germany and those hopes have been disappointed, as France was warned they would be by a number of clear-sighted financial authorities from the

beginning. Yet it would be wrong to assume that France has done nothing. Year after year the deficit in the budget has been reduced until from 20,000,000,000 francs it stood in the last year of the Poincaré régime at somewhere about 4,000,000,000. M. Herriot, with his Finance Minister, M. Clémentel, did not improve the position. On the contrary, in spite of his promises, he somewhat worsened it, and, as M. Caillaux found, the budget, which should have been passed before the end of last year, is still being discussed and shows a deficit which M. Caillaux estimated at between 3,000,000,000 and 4,000,-

000,000 francs. For the first time, M. Caillaux has resolved to prepare a perfectly sincere statement of accounts and to make the credit and the debit side of the budget balance. To do this it will be necessary to impose further taxation, and if one remembers that for a Frenchman a franc is still a franc and is not merely four or five cents, as it is reckoned abroad, the burden of taxation borne by France is by no means light. Moreover, the Treasury has immense liabilities

to meet this year, owing to the maturing of bonds, and it will require the greatest ingenuity and a most complete restoration of confidence for France successfully to surmount the obstacles which are in her path. The best authorities, such as Lord Bradbury, assert that, while eventually France will be able to pay, a certain respite is essential.

It would be well, therefore, in all study of the debt problem, to keep in mind the two phases of the case-namely, the need for recognition and not repudiation, and the need for a reasonable consideration of France's immediate capacity to effect payments.

One is inclined to hesitate in an effort to gain a clear understanding and appreciation of such a statement as this made

Is Public Opinion Tyrannical?

in the course of a commencement address at Cornell University by President Livingston Farrand, of that institution: "The tyranny of uninformed public opinion, the oppression of popular prejudice, is far more dangerous than

that of the autocrat, and we are facing that tyranny today." The impression at first is that the reader or listener must have misunderstood. The arraignment and conclusion are both presented with apparent finality. Standing thus, they accuse and convict the people of a democracy of a most serious social or political offense, and point to dangers heretofore little more than dreamed of in what has been somewhat pridefully referred to as the land of the free and the home of the brave.

But a closer analysis and a study of the context serve to reassure, at least in some degree, the overwrought auditor or reader who gains from the introductory paragraph and the accompanying headlines a somewhat distorted impression of the whole address. The target at which the learned educator directs his darts is discovered to be intolerance, rather than that tyranny which a free people have been taught to shun, if not to fear. He had set out to preach, as he is found to have announced, "the gospel of the open mind," or, more specifically, as he explained, "the right to profess and accept truth as truth might be vouchsafed." He is concerned because of the belief which he expresses, that the "liberty of person and conscience, which we have considered the basic ideal of our American people, is endangered by a clogging intoler-

The speaker included in his arraignment both "intolerant" laws and "intolerant" religious creeds. And when he had done that, he had haled before his inquisitorial forum those enemies of political and social progress which have longest and most stubbornly hindered the advancement of the human race. Lacking the full text of the address, it is impossible, by a superficial analysis, to discover the clear import of the arraignment against intolerance in government. But this charge is quoted: "Recent statutory inhibitions of certain of our commonwealths call for a fresh analysis of our capacity for self-government." The blanket indictment is somewhat vague. One wonders if another college president has seen fit to array himself against what has been wrongly referred to as "sumptuary" legislation, which is the somewhat polite method of attacking the law which prohibits the manufacture and sale of intoxicating liquors.

But it was his intention, evidently, to lay chief stress upon what he describes as intolerance in religion. The controversy is as old as civilization. Arrayed on one side is scholastic theology opposed to what the communicant unblushingly defends as a part of his confession of faith, based upon revelation. It is the province of the former, according to Dr. Farrand, "to add little by little to the edifice of truth." Assuming this as a premise, he says, "The error of errors is always the assumption that final truth has been achieved.' If intolerance can be imputed to those who assume and are convinced that there has been a final and understandable revelation of demonstrable Truth, just as properly can those who deny this be declared to be the supporters and champions of man-made theologies, which have been so many and so varied throughout the ages that those who adhere to one today are willing tomorrow to defend what they accept as an advanced view.

The first and all-important understanding to be gained is that Truth is demonstrable. This realized, the possibility of dangers from oppression and intolerance vanishes in the light of convincing and irrefutable proof.

While there no doubt will be general public approval of the attitude of President Coolidge

The Colorado River Project

in opposing, as he is said to have done in the matter of the proposed Colorado River-Boulder Dam project, the infringement by the Government upon legitimate fields of private enterprise, there may be said

to be an equally strong sentiment in favor of so safeguarding this particular enterprise as to insure to the public, under strict governmental protection, the enjoyment of rights which are threatened if privately controlled. In recent dispatches the President has been quoted as saying that he believes public funds should be generously devoted to the matter of flood control along the Colorado River, but that in his opinion the development and distribution of power should be left to private enterprises.

Many thoughtful persons in the states directly concerned in the project, which includes the impounding and distribution of water to be used in irrigation, as well as those who have hoped that through the generation and distribution of cheap hydroelectric power many new industries might be built up, will be disappointed if it is decided that the Government is to yield the right to private corporations or individuals to control, and perhaps monopolize, what they regard as strictly a public utility which can be properly and satisfactorily operated under federal control.

The people of the western states speak from a conviction gained by hard experience when they warn of the dangers of such monopolization. They see now a determined effort on the part of politicians and capitalists to secure to themselves, from this very project, benefits which the public should be permitted to enjoy. The enterprise as contemplated is a tremendous one. Those unfamiliar with the geography of the sections which will be affected have little conception of the wealth and area involved. It is in no sense a project which contemplates private control or operation, no matter how honestly or fairly managed.

It is a little difficult to draw the line of demarcation quite as fine as it has been attempted to draw it in separating the field of federal activity from that of private enterprise. Logically it would seem that a vast project of this kind, which demands the appropriation of millions of dollars of public money, is one which should as reasonably demand continued federal regulation and management, especially where the products, such as water and power, can be provided and distributed by the simple and ordinary processes with which all are familiar. It would seem to be an undertaking in which government and business might unite without any thought of paternalism or undue interference by the Government.

Historians of art have a more or less arbitrary way of discussing their subject matter

A Quarter

Century of

Modern

Painting

according to the calendar. They docket and divide the various phases of art by centuries whole, half or quarter, as the case may be-and come off fairly well in the process. Now that five and twenty years of

the present century have practically come to a conclusion, it would seem a proper point for the student of modern painting to pause and ask his brothers of the brush just how things stand with them, just what has really been accomplished to date in those studios where the pictorial issues of the day are being thrashed out.

Glancing back to the placid reaches of the Victorian era, when the first glimmering suspicions of an art Oriental were dawning on the enraptured sense of a few London painters, it will be readily seen what a tremendous mass of new art forms has debouched almost overnight upon the waiting thought of the twentieth century. From Japan, China, Persia, India, Russia, the South Seas, have come successive waves of inspiration to the studios of Europe and America, until the artist has scarcely known which road to take amid the maze of inviting influences suddenly unfolded

What has come out of this complex and experimental quarter-century of art must indeed be the question of the onlooker, as he surveys the walls of the modernist exhibitions. Such definite figures as Cézanne and Matisse, Gaugin and Picasso, have been posited and have had their direct influence on contemporary art. Many interesting variations of the prevailing tendencies of the ateliers have been recorded, and many a talent, freed from the shackles of academic scruples, has found a considerable latitude in the newly opened fields of modernistic art. The breach between the old nineteenth century academic order of things and the frankly unabashed modernistic twentieth appears wider than ever at this point of time, and the need for some really great guiding light seems more than ever urgent.

If the "light touch," as one art critic has so ably put it, is perhaps the most consequential finding of this period under consideration-a period that has unquestionably seen a greater undoing of Old World conventions and confidences than any other-then there is little more to do than to wait patiently until that time when this lightsomeness shall have merged into some more complete expression of beauty when the artist of the twentieth century will be found striking out with more conviction than courage, with a sense of his calling more consecrated than experimental. The time seems almost ripe for an awe-inspiring genius to arise in the arts, a modern Titian, a presentday Tintoretto, or Rembrandt, or Velásquez. The immediate conditions need the quieting touch of the master painter who will be able to sort out the various fragments of modernism and put them together in a truly inspired pattern.

Editorial Notes

One has often felt that it was not wise to take too seriously the shafts of ridicule directed in some British newspapers against the prohibition reform in the United States, because frequently such shafts represent little more than the argument of a man with his back to the wall. Nevertheless, it is gratifying to find one of these papers daring to express the opposite point of view. The Children's Newspaper, which has a large circulation among the youth of the British Empire, not long since ran an article under the heading, "Good for the Children." It read in part:

The New York Children's Court has dealt with 3000 fewer neglected children each year since prohibition

Chicago had 5328 such cases in 1919 and 3350 in 1923. Massachusetts reports an average decrease of 30 per cent in child cases, and the prison population of that State has fallen off by one-half.

Prohibition may be a hard law to carry out, but, says one of America's great papers, "The children and the children's children will tell the story."

It was more than a mere collection of peace platitudes which comprised the address given recently in Boston, Mass., in commemoration of the one hundred and fiftieth anniversary of the battle of Bunker Hill, by Senator William M. Butler. He was discussing the lesson of preparedness which he saw in that engagement, and while stressing the desirability of permanent world peace, warned that it would come about when the nations had mutual faith in one another. In this connection he said in part:

Peace founded upon fear is not permanent. Peace, to be lasting, must be founded upon a sincere desire for peace, a determined purpose to have peace, and faith and confidence in those with whom we associate for peace. . . . This is not a time for great armies and navies, but a time for great understanding and great intelligence. It can never be a time for entanglements in the affairs of other nations, but it is always a time for friendly and brotherly intercourse, for mutual well-being

A Consul in the Mystic Isles

By MARC T. GREENE

A huge liner, making a "South Sea Cruise de Luxe," had just come into the lagoon here and anchored a few

hundred yards off the beach. The quarantine officer's

launch lay alongside, and a score, of outrigger canoe

circled about, their dusky occupants gazing wonderingly up at the towering decks thronged with gayly dressed

tourists. Presently one of the ship's boats, almost as large as the trading schooners anchored in the lagoon,

landed a group of passengers. Two redoubtable-looking individuals proceeded directly to the American Consulate,

being that official's first visitors of the day. They were

without any further preliminary than a brusque greet-

without any further preliminary than a brusque greeting, "I want to register a complaint. And I want it transmitted to Washington without delay. I paid \$9000 to the Anglo-Pacific S'eamship Company for this cruise from New York to the South Seas." He mopped his streaming face and paused for breath. "It was advertised to stop at unknown islands"—the Consul could scarcely forbear

smile-"for feasts, and native dances, and-and canni-

bal rites. Great doings were going to take place at

Samoa, and at the Fijis, and here; while at the Marquesas, where some chap once lived with the cannibals

and wrote a book about it-well, here's an advertise-

'You didn't see it, then?" suggested the Consul blandly.

'Doc' Cook?" repeated the Consul, interrogatively.

made a careful note to the effect that it was to be com-

municated to the under-clerk of the Third Assistant Sec

retary of State, he resumed the compilation of a detailed

reply to a "trade inquiry" from Battle Creek, Mich. In

the meantime the protesting passengers and their fellow

voyagers "de luxe" roamed the hot and dirty streets of

the little tropical port, finding nothing at all of what

they had expected, wondering where all the storied

romance might be, and departing a couple of days later

Presently a wan-looking youth tip-toed cautiously

"Well, come in," bade the Consul a little tartly. He

"Reckon you'll have to help me out. Mister Amurrican-uncil," ventured the youth. "This here French police-

'Do you mean to say you are down here without any

"It was like this, mister. I was loafing on the water

front in Frisco and I saw a dinky little steamboat along-side one of the wharves. 'Where you bound, Cap?' I

side one of the wharves. 'Where you bound, Cap?' I asked a fellow on deck. He says the South Seas. Right then my taste for travel gets hold of me again. Been

reading in the public library the day before about those parts, how it don't cost anything to live there, how every

body dances and sings all the time, and how all the-

man talks to me a lot I don't understand, but a chap I met up with on the beach tells me it's some kind of papers they're after. 'Papers for what?' I says. And—"

passport?" demanded the Consul, finding something new

quite convinced there was none and never had been any

across the broad veranda of the Consulate, and attempted

an ingratiating smile from the doorway.

knew the type very well indeed.

quired the Consul wearily.

Seas and pretended to find the North Pole, too!'

ment of what we were going to see at the Marquesas."

"As an American citizen, Consul," stated one of them,

red of face, very warm, and quite irritable

"The skipper said something about it. Told me it would cost \$10, and then ten more to have the French Council 'veese' it, and then—"
"You didn't do it?"

"I didn't—'xcuse me, Mister Council, sir. But not having had above three bones in my pocket at the time, I couldn't afford no luxuries like passports and 'veeses.' But my taste for travel being on me, I just naturally had to travel. I'm from Hutchinson, Kan. Couldn't hardly expect me to stay there all my life, could you,

"That'll do!" admonished the official, acidly. "Come back next week, and I'll see what I can do for you."

"It's people with a taste for travel who add to a consul's joys," he murmured, as he took down "Consular Instructions, No. 346," and consulted the index for the chapter headed "American Citizens in Difficulties in Foreign Lands."

"De luxe cruise" promoters who advertise things they cannot provide and do not expect to, and the producers of the perfervid "romance" which exercises on those with a "taste for travel" the influence of the serpent's eyes on the fascinated bird, were in deep dis-favor with the Consul just then. And, being familiar with his Homer, he thought of the sailors of Ulysses and the dreadful predicament in which they found themselves, through their too-prompt response to the siren's call. He turned page after page of the "Instructions," vainly endeavoring to discover something applicable to "de luxe

"We haven't been near the Marquesas, wherever they are. And as to seeing all these things that old 'Doc' Cook "Why don't the tourists go to Honolulu or Hong Kong," he grumbled, "where they can sit in the lounge of a big hotel and fancy they are finding romance?" "Anything you can do for us yet, Mister Consul?" he heard murmured insinuatingly, as he bent over his vol-The Consul sighed gently, and "registered the protest" in "Miscellaneous Ledger, No. 8B." Having done this and

Two "beachcombers," tattered hats in grimy hands, hesitated in the doorway. The appearance of the great liner, with its flaming banner of a far country, had stirred the flickering embers of old longings. "Anything

to get us out of here. We'll shovel coal to reach a civil-ized country again." "What brought you down here, anyway?" the Consul Well, mostly the stuff this chap, O'Higgins, wrote

about the cheap living, and the-" "Didn't you make any inquiries at all beyond that?" "Ask questions? What for? We reckoned these books that are in all the libraries and the book stores meant what they said. The place must have changed, that's all. we've been here four months; and what with eating in the Chinese places, sleeping in the lumber yard, and not hav-ing even enough money to buy those pieces of red cloth the Kanakas call 'paroos,' why we've had our fill of the South Seas! Get us out, Mister Consul! We'd rather beg along Market Street in 'Frisco every day in the year than

go to seed in this hole any longer! Without any doubt they meant it, and the Consul was not unmoved. "There's a lumber schooner due in from the coast next week," he said. "I'll try to arrange with the captain for you to work your ways back. And if you see anybody else with a taste for travel in San Francisco, just tell them not to come this way." "Leave it to us," the two assured him, in mingled

tones of deep conviction.
"At any rate," reflected the Consul, noting that the hour of 11 had arrived, and remembering that nothing but food and rest would occupy the attention of anyone until several hours later, "the hours are shorter than they would be in Birmingham."

The World's Great Capitals: The Week in Moscow

Moscow, May 26. A regular feature of every Soviet Congress is the meeting of the Communist "fractsia," or group of delegates just on the eve of the close of the Congress. As was the case last year, Gregory Zinovien addressed the "fractsia" this year, outlining the internal and international problems which stand before the Russian Communist Party. M. Zinovieff declared that the Soviet industries were progressing satisfactorily, but that the party had been compelled to make a strategic detour in making concessions to the richer peasants. So far as the Communist Internationale was concerned, M. Zinovieff declared that the position in Western Europe was not favorable to any immediate revolutionary activity. but that the outlook was more hopeful in the East, where China had already shown itself fertile soil for Communist

The automatic slot machines which have been installed in the square outside the State Opera House have met with instantaneous success. During the first days of their existence crowds of people waited in line for the privilege of depositing a fifteen-kopeck piece and receiving a modest square of chocolate in return. It seems, however, that some of the Moscow citizens have seen in the slot machines convenient receptacles for getting rid of their Tsarist coins, and guards have been stationed to watch out for this practice.

Dissent is not a characteristic note in Soviet congresses, and so there was a certain element of surprise when a tall peasant from Ekaterinoslav Province, in the Ukraine, took the floor on the last day of the Congress and expressed indignation at the fact that no non-party peasants from Ekaterinoslav were included in the new Soviet Executive Committee. Everyone turned about to look at the dissenter, and his complaint elicited prompt replies from three prominent officials, Kalinin, President of the Russian Soviet Republic; Petrovsky, President of the Ukrainian Soviet Republic, and Yenukidze, secretary of the Soviet Executive Committee. It was explained that the former provinces in the Ukraine had been divided into smaller administrative districts, known as okrugs and that it would be impossible for each okrug to have a representative. Petrovsky added that the former Ekaterinoslav sent three non-party peasants to the Executive explanations, the yeoman from Ekaterinoslav had the satisfaction of creating a mild stir in the Congress. 4 4 4

Mr. Hodgson, the British representative in Moscow, who returned to Moscow from Persia by way of the Caucasus, has been quoted in the Moscow newspapers as having declared in Tiflis that he could see signs of reconstruction everywhere. Asked about the anti-Soviet campaign in the British press, Mr. Hodgson is reported have replied that freedom of the press existed in England and, therefore, that the Government could not control the policies and statements of the newspapers.

Comments in the Soviet press have recently indicated increasing consciousness of the hostile attitude of foreign governments toward the activities of the Communist Internationale. Mr. Steklov, the editor of the official Government organ, Izvestia, has just undertaken to answer the attack contained in a recent speech by the Austrian Foreign Minister, Mattei. He argued that Austria, as a bourgeois government, was quite as closely connected with other bourgeois governments as the Soviet Government with the Communist Internationale However, the Soviet Government does not attempt to hold Austria responsible for the hostile and destructive activities of the Allies during the period of the Russian civil war. He also quoted Mussolini to the effect that the behavior of the Soviet diplomatic representatives Foreign Minister's accusations could be attributed to the fact that Austria was unable to carry out an independent foreign policy, because of its depe England and other large powers which are hostile to the

The problem of how to address a stranger is quite complicated in the Soviet Union. The word "tovaristch," or comrade, has come into general use since the Revolution; but its indiscriminate use is subject to severa restrictions. A strict Communist, for instance, would quite possibly resent being called "comrade" by anyone who did not share his party faith; and anyone who has not in sympathy with Communist ideas would be equally likely to object to the appellation, for quite different reasons. The word "grazhdyanin" (citizen) has also that this is too harsh and fordid not share his party faith; and anyone who was acquired some currency; but this is too harsh and for-

bidding for friendly use; it suggests the importunate tax-collector, or policeman or street car conductor. Perhaps because of the Russian habit of addressing friends by the first name the Russian language does not include any exact equivalent for the English Mr., the French Monsieur, and the German Herr. Gospodin is the nearest Russian equivalent for these western European words; but it contains a certain aristocratic suggestion and is, therefore, only used with discretion in these revolutionary

Foreign, especially American, influence continues to predominate in the Russian motion-picture field. At the present time one would have difficulty in finding a single native production in the Moscow motion-picture houses. American films are most numerous, with Mary Pickford as a special favorite. A Swedish novelty, "Solveig," is produced and the German Nibelungen film has attracted a good deal of favorabl, attention and comment

"The Export Corporation Plan"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I have read with interest George N. Peek's letter which was published in a recent issue of the Monitor, under the caption, "The Export Corporation Plan." The supporter of the protective tariff policy in America has few arguments at his command with which to dispute the claim of Mr. Peek and of those who hold with him in this con-

In the writer's opinion, the purpose of the McNary-Haugen bill was better than its character. The most objectionable feature of that bill was that it proposed to isolate the interests of American agriculture from the interests of the agriculture of the world, and put upon American consumers alone the price which the should return to the agriculturist for profit, in exchange for the service he performs for it. The "dumping" feature of the McNary-Haugen bill was

objectionable from more than a single point of view. In 1923-24 the United States exported over 200,000,000 bushels of wheat, or 25 per cent of its total product. To dump this amount of wheat into the world's markets irrespective of price and profits is inefficient from two points

Under the provisions of the McNary-Haugen bill it would put upon the American consumers the burden of profits, which should accrue to the American producer of wheat, for the 25 per cent of service that tributes to the outside world, but in which Americans have no share.

Again, on the American continent, Canada and the Argentine Republic co-operate with the United States in producing for the world its bread, the most important item, perhaps, of its food supply. In 1923-24, Canada's wheat export was more than 350,000,000 bushels, and that of the Argentine Republic 140,000,000. In the same year Canada was a purchaser of American products up to more than \$500,000,000 worth. Would it be good business policy for America, through the dumping feature McNary-Haugen bill, to impair the purchasing power of these important customers by breaking for Canadians and Argentina wheat producers the price of their product in the markets of the outside world?

Agriculture is not a national but a world service, and the United States cannot, in justice to the American food consuming public, the world's food-producing purchasers of the output of American factories, or that percentage of American labor that works in the factories pro their output for foreign customers, isolate her interests from those of the other important agricultural countries of the world on this question. Minneapolis, Minn.

"Bootleggers Sent to Jail"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: In a recent issue of your paper I read an article under the heading, "Bootleggers Sent to Jail," and am glad to

note the publicity you have given to this subject. I am of the firm belief that, if the judges generally would adopt the policy of sentencing such offenders to jail terms, we would soon be rid of a lot of these cases. It has worked successfully with us here in my circuit,

and I am sure it would promote a better respect for the law if so many were not allowed to go on the mere payment of a fine.

ORIEN S. CROSS, Circuit Judge.

Twentieth Judicial Circuit, State of Michigan.
